ECONOMIC IMPORTANCE OF ALGAE

1. M. AJaya 2. p. M. Anirtha B. K. Sheya prishe 4. G. Shushela 5. R. Ray

IMPORTANCE OF ALGAE

INTRODUCTION :-

Algae are usigoilous. Practically occurring in every habitable environmental across the globe Majority of algoe are abundant in stagnant waters. They have also been reported in habitats like hot water springs, ice, damp soils, rocks crewices, tree trunks, old walls, garbage. pits and waster water bunks. Tree floating assemblage of algae also constitute. a huge group of algae which are known as phytoplankton. A number of algae live inside tissue of other members af plant kingdom which are known as endophytes. In some cases symbiotic association

- The photoautotrophic algae are the major producers of organic matorials and they play alkey role at the base of food chain in aquatic and semi-aquatic hubitats.

- The algae constitute a source of base food wherein their chemical Extracts have a potential in manufacture of synthetic food and other

Some times the algae are labeled as phycotoxins as they Secrete certain toxins which cause poisoning. "Certain algae also play "nuisance role" wherein they tend to block water supply canals on filtration unity due to entrophication of reservoirs and Connecting tubes or canals. Agar:-

Agar, a gebitinous substance derived from red algae, has a number of commercial uses. It is a good midium on which to grow hacteria and funge, as most microorganisms cannot digest-agar.

GDC, Nagari Dept.of Political Science Field Trip 2016-17 Brief Report on Field Trip

The staff of political science and the students of BA course visited local Tahasildar office of Nagari on 19-12-2016 as a part of Field Trip program. The aim of the program was to study the administration of mandal level. Tahasildar invited us and explained the powers and functions of Tahasildar and his services to the people of Nagari mandal.

Students were enriched the practical knowledge about the mandal administration and also they knew various programs such as welfare, revenue, land pattas and public distribution system. Students also got the knowledge about various services of tahasildar such as issuing residence certificate, income and caste certificates. Students were already got theoretical about the powers and functions of tahasildar, the field trip was very useful to get practical knowledge. Ultimately students were well satisfied with the field trip.

VISA Debit Cards

Highlighting Features of VISA Debit Cards

- A Visa debit card is an infinitely safer alternative to carrying hard cash
- VISA debit cards are accepted widely all over the world at millions of merchant establishments.
- Convenience of instant access to cash, any time you need it at over 1.9 million VISA and PLUS
- logo bearing ATMs.
- Make online shopping highly secure with Visa's Secure Network.

Overview of VISA Debit Cards

VISA has been a name all of us are familiar with. Might have been a credit card in our parent's wallet or our very own debit card which we now hold dear, in our wallets. Ever wondered, how VISA came to be? Well, it all started in the year 1958, when Bank of America launched its Bank Americard program, which was devised to provide a centralized system of payments across the state of California. During the course of the following years, several other banks across the U.S obtained licenses to adopt the Bank Americard system from the Bank of America.

Finally, in the year 1976, the Bank Americard system of centralized payments was finally renamed as VISA, a card which is now enjoys a popular presence in over 200 countries. Visa holds tremendous significance in the global financial markets as one of the key methods of making payments while also helping to set global standards when it comes to financial transactions and how they are carried out. Read on to find out more about how VISA debit cards have helped secure transactions worldwide and bringing peace of mind to millions of customers.

Visa Debit Cards - Types Of Cards Offered

Visa offers a range of debit cards, each of which has been designed to meet a specific set of needs and individual requirements. These cards present you with exclusive privileges for a host of lifestyle activities like shopping, travel, dining, golf, etc. Learn more about each of these cards below.

VISA Classic

Accepted at millions of locations worldwide, the VISA Classic debit card can be used not only to withdraw cash from ATMs but also to pay for purchases at merchant establishments.

VISA Gold

Experience the finer side of life with the VISA Gold debit card which offers special offers at dining, retail, entertainment and travel establishments. In addition, you are also entitled to receive medical and travel assistance and legal referral / assistance, along with toll-free access to the 24 Hour Customer Assistance Service.

VISA Platinum

Step up and enjoy a world of privileges and rewards with the VISA Platinum debit card. Make the most of exclusive deals & discounts or call on the assistance of the 24x7 Concierge Service, be it for restaurant recommendations, flight reservations, etc.

VISA Signature

An individual of discerning tastes deserves nothing but the best. The VISA Signature debit card complements your lifestyle by providing you with unrivalled access to the best rewards, deals and discounts there are. Welcomed worldwide, the VISA Signature also entitles you to the 24 Hour Concierge service, along with round the clock assistance regarding your card.

Top reasons why debit card is the perfect new-age banking

Online transactions

Pay bills, shop, browse, book tickets and everything else with your debit card from the comfort of your home and office.

Bonus Points & Gifts

Debit card has come a long way. With irresistible perks like cashback offers, rewards and many more, it is more than a medium for fund transactions.

Pre-paid

There is no chance of overspending and hence no chance of falling into pits of debt.

Convenient & swift transactions

One swipe at any **PoS** or **ATM**, and transaction is done. With its 128-bit encrypted security, it is as safe as it is quick.

Track expenses & stay within budget

You are always aware of how much you spend and how much you have left. A highly transparent system, you get SMS/ e-statement on every time you spend.

Banking Ombudsman Scheme, 2006 FAQs on the Banking Ombudsman Scheme

1. What is the Banking Ombudsman Scheme?

The Banking Ombudsman Scheme enables an expeditious and inexpensive forum to bank customers for resolution complaints relating to certain services rendered by banks. The Banking Ombudsman Scheme is introduced under Sec 35 A of the Banking Regulation Act, 1949 by RBI with effect from 1995.

2. Who is a Banking Ombudsman?

The Banking Ombudsman is a senior official appointed by the Reserve Bank of India to redress customer complaagainst deficiency in certain banking services.

3. How many Banking Ombudsmen have been appointed and where are they located?

As on date, fifteen Banking Ombudsmen have been appointed with their offices located mostly in state capitals. addresses and contact details of the Banking Ombudsman offices have been provided in the annex.

4. Which are the banks covered under the Banking Ombudsman Scheme, 2006?

All Scheduled Commercial Banks, Regional Rural Banks and Scheduled Primary Co-operative Banks are covered under Scheme.

5. What are the grounds of complaints?

The Banking Ombudsman can receive and consider any complaint relating to the following deficiency in banking servi-(including internet banking):

- non-payment or inordinate delay in the payment or collection of cheques, drafts, bills etc.;
- non-acceptance, without sufficient cause, of small denomination notes tendered for any purpose, and for chargin commission in respect thereof;
- non-acceptance, without sufficient cause, of coins tendered and for charging of commission in respect thereof;
- non-payment or delay in payment of inward remittances ;
- failure to issue or delay in issue of drafts, pay orders or bankers' cheques;
- non-adherence to prescribed working hours ;
- failure to provide or delay in providing a banking facility (other than loans and advances) promised in writing by a t or its direct selling agents;
- delays, non-credit of proceeds to parties accounts, non-payment of deposit or non-observance of the Reserve E directives, if any, applicable to rate of interest on deposits in any savings, current or other account maintained wi bank;
- complaints from Non-Resident Indians having accounts in India in relation to their remittances from abroad, depr and other bank-related matters;
- refusal to open deposit accounts without any valid reason for refusal;
- levying of charges without adequate prior notice to the customer;
- non-adherence by the bank or its subsidiaries to the instructions of Reserve Bank on ATM/Debit card operation credit card operations;
- non-disbursement or delay in disbursement of pension (to the extent the grievance can be attributed to the actio the part of the bank concerned, but not with regard to its employees);
- refusal to accept or delay in accepting payment towards taxes, as required by Reserve Bank/Government;
- refusal to issue or delay in issuing, or failure to service or delay in servicing or redemption of Government securitie
 forced closure of deposit accounts without due notice or without sufficient reason;
- refusal to close or delay in closing the accounts;
- non-adherence to the fair practices code as adopted by the bank or non-adherence to the provisions of the Coc Bank s Commitments to Customers issued by Banking Codes and Standards Board of India and as adopted by bank;
- non-observance of Reserve Bank guidelines on engagement of recovery agents by banks; and
- any other matter relating to the violation of the directives issued by the Reserve Bank in relation to banking or c services.

A customer can also lodge a complaint on the following grounds of deficiency in service with respect to loans . advances

- non-observance of Reserve Bank Directives on interest rates;
- delays in sanction, disbursement or non-observance of prescribed time schedule for disposal of loan applications;
- non-acceptance of application for loans without furnishing valid reasons to the applicant; and
- non-adherence to the provisions of the fair practices code for lenders as adopted by the bank or Code of Ba Commitment to Customers, as the case may be;
- non-observance of any other direction or instruction of the Reserve Bank as may be specified by the Reserve E for this purpose from time to time.
- The Banking Ombudsman may also deal with such other matter as may be specified by the Reserve Bank from to time.

6. When can one file a complaint?

Our can file a constitute balance the Panislan Controduces it the scale is not excelsed from the bank collete a anded of

the bank, to present their case.

It is up to the complainant to accept the award in full and final settlement of your complaint or to reject it.

18.1s there any further recourse available if one rejects the Banking Ombudsman's decision?

If one is not satisfied with the decision passed by the Banking Ombudsman, one can approach the appellate autho against the Banking Ombudsmen's decision. Appellate Authority is vested with a Deputy Governor of the RBI. One can also explore any other recourse and/or remedies available to him/her as per the law

The bank also has the option to file an appeal before the appellate authority under the scheme.

19. Is there any time limit for filing an appeal?

If one is aggrieved by the decision, one may, within 30 days of the date of receipt of the award, appeal against the aw before the appellate authority. The appellate authority may, if he/ she is satisfied that the applicant had sufficient cause not making an application for appeal within time, also allow a further period not exceeding 30 days.

20. How does the appellate authority deal with the appeal?

- The appellate authority may
- i. dismiss the appeal; or
- ii. allow the appeal and set aside the award; or

iii, send the matter to the Banking Ombudsman for fresh disposal in accordance with such directions as the appel authority may consider necessary or proper; or

iv, modify the award and pass such directions as may be necessary to give effect to the modified award; or v. pass any other order as it may deem fit.

DATE : PLACE :

> SRI VENKATESWARA UNIVERSITY TIRUPATHI- 517501 2016-17 ACKNOWLEDGEMENT

A part from the effort of me the success of the project depends largely on the encouragement and guidelines of many others. I take opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project.

I would also like to thanks our **Principal Sri .Dr. R RAJENDRA NAIDU**, **M.Com P.h.D.**, who had been a source of inspiration and for his timely guidance in the conduct of my project work.

I would also like to show my greatest appreciation to Sri K. MANOHAR, M.Com, P.h.D., Head of Department of Commerce. I can't say thanks enough for this tremendous support and help. I feel motivated and encouraged every time I attend his meeting. With out his encouragement and guidance this project would not have materialized.

I wish to express my deep sense of gratitude to my internal guide Sri. KARTHIK, M.C.A Lecturer in Computers, for his able guidance and useful suggestion, which helped me in completing the seminar report, in time.

Finally, yet importantly, I would to express my heartfelt thanks to my beloved parents for their blessings, my friends/classmates for their help and wishes for the successful completion of this project

INTRODUCTON

Haemoglobin is the colouring matter in erythrocytes.

The

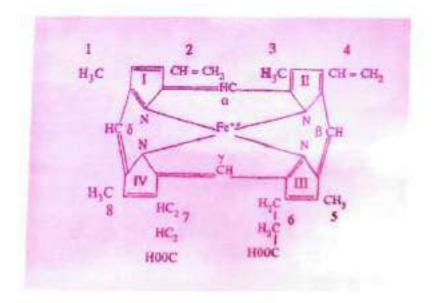

respiratory function of the blood is carried out by Hemoglobin.

Haemoglobin is a conjugated protein consisting of an

iron

Containing pigment portion called Haem 4% and a protein of the his tone class goblin (96%). Haem is an iron containing porphyrin known as Iron protoporphyrin. (IX Metalloporphyrin) therefore, hemoglobin is an iron+prophyrin+globin compound.

Four Haem molecules are attached to the globin molecule to from one molecule of haemoglobin. The porphyrin nucleus consists of four pyrrole rings joined by four methane "bridges". The porphyrins are the tetra pyrrols.

Structure of Haemoglobin

Iron Protoporphyrin IX

The pyrrole rings are numbered I, II and IV. The methane bridges are labeled a, **B**,? and d. The positions to which side chains attached are numbered from 1-8. The side chains at the respective positions are in the 1, 3, 5 and 8 positions methyl (-CH3). In 2&4 positions – vinyl group (CH=CH2) and in 6&7 positions propionic acid (CH2-CH2-COOH).

The iron in the haem is the ferrous state and is attached to N of each pyrrole ring and N of the imidozol group is associated with globin; a bond is available for loose combination with oxygen and oxyhaemoglobin or CO in corboxy haemoglobin. In the reduced hemoglobin this place is occupied by OH group.

The important biochemical property of the haemoglobin is its power to combine easily with oxygen and to give up this oxygen easily when exposes to low oxygen tension. Each molecule of heam will combine with one molecule of oxygen (CO) as there are four heam molecules in one Hb molecule each will combine with four molecule of oxygen.

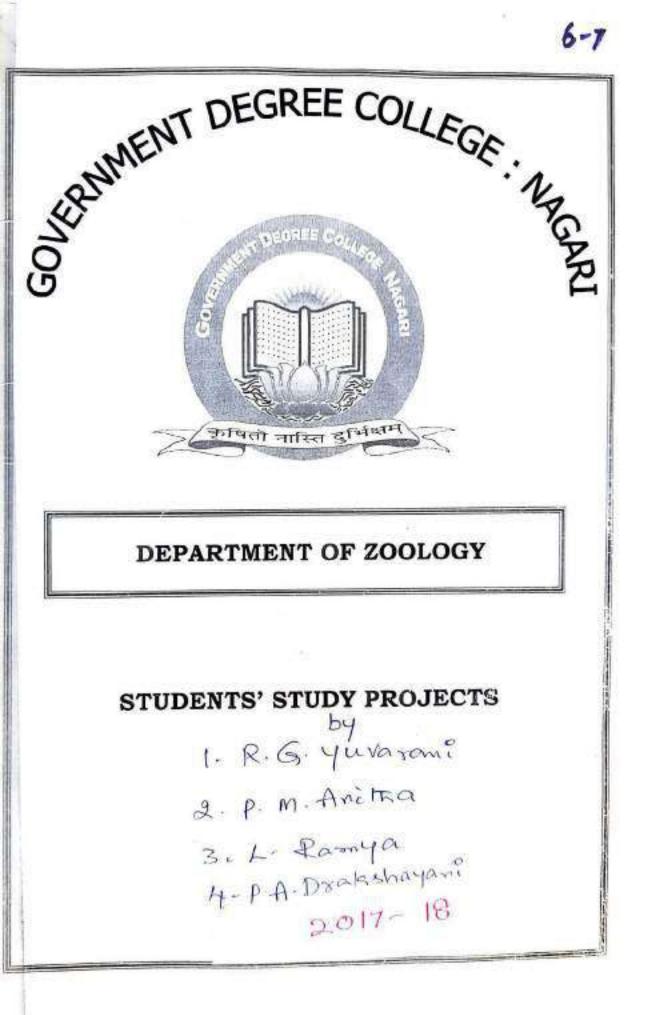

Hb+Fe4. Hb (Feo4)4 (Oxyhemoglobin)

In the same way it will combine with CO also and from carboxy haemoglobin.

Molecular Weight:

The molecular weight of haemoglobin is 68,000. This high molecular weight and consequently great size of the molecules are the causes of the colloidal nature when they are dispersed in water.

Field Trip

2017-18

Brief Report on Field Trip

BA students and staff of Political Science visited the famous Sri Shiridi Sai Baba temple on 04-12-2017. The temple is located on the hill at the outskirts of Nagari town towards puttur road.

We reached the temple around 11 am on foot and much impressed by the architecture of the temple. We walked round the temple watched the spiritual atmosphere. Then we were entered into the temple. We got spiritual feeling when we saw the idol of Bhagavan Sai Baba. We also interact the devotees who were came from Nagari and surrounding villages. After worshiped the Sri Sai Baba we received prasadam from the priest.

The trip was promoted the spirituality among the staff and students.By this trip the students might be got spiritual attitude and it will may be keep in their lifelong.

Issue of ₹ 2000 Banknotes

The Reserve Bank of India will shortly issue ₹ 2000 denomination banknotes in the Mahatma Gandhi (New) Series, without the Inset letter, bearing signature of Dr. Urjit R. Patel, Governor, Reserve Bank of India, and the year of printing '2016' printed on the reverse of the banknote. The new denomination has Motif of Mangalyaan on the reverse, depicting the country's first venture into the interplanetary space. The base colour of the note is magenta. The note has other designs, geometric patterns aligning with the overall colour scheme, both at the obverse and reverse.

The salient features of the banknotes will be as under:

Obverse (Front)

1.See through register with denominational numeral 2000

2.Latent image with denominational numeral 2000

3.Denominational numeral 2000 in Devnagari

4.Portrait of Mshatma Gandhi at the centre 5.Micro letters 'RBI' and '2000' on the left side of the banknote

6. Windowed security thread with inscriptions 'MTCT', RBI and 2000 on banknotes with colour shift. Colour of the thread changes from green to blue when the note is tilted

7.Guarantee Clause, Governor's signature with Promise Clause and RBI emblem towards right 8.Denominational numeral with Rupee Symbol, ₹2000 in colour changing ink (green to blue) on bottom right

Obverse (Front)

9. Ashoka Pillar emblem on the right Mahatma Gandhi portrait and electrotype (2000) watermarks

10.Number panel with numerals growing from small to big on the top left side and bottom right side

For visually impaired

Integlio or raised printing of Mahatma Gandhi portrait, Ashoka Pillar emblem, bleed lines and identity mark

11.Horizontal rectangle with ₹2000 in reised print on the right 12.Soven angular bleed lines on left and right side in mised print

Reverse (Back)

13. Year of printing of the note on the left

14. Swachh Bharat logo with slogan

15. Language panel towards the centre

16. Motif of Mangalavan

 Denominational numeral 2000 in Devnagari

Dimension of the banknote will be 66 mm × 166 mm

Alpana Killawala Principal Adviser

Press Release : 2016-2017/1144

Rs. 500

The size is 63mm x 150mm, colour is stone grey with Red Fort and Mahatma Gandhi's image on each sides

Features:

1. See through register in denomination numeral

2. Latent image of the denomination numeral

3. Denomination numeral in Devnagari

4. Orientation of Mahatma Gandhi's portrait changed

5. Windowed security thread changes from green to blue when note is tilted

6. Guarantee clause, Governor's signature, RBI emblem shifted towards right

7. Portrait and electrotype watermarks

8. Number panel with numerals growing from small to big on top left and bottom right sides

9. Denomination in nuemrals with Rupee symbol in colour changing ink (green to blue) on bottom right

10. Ashoka pillar emblem on right

For visually impaired:

11. Circle with Rs. 500 in raised print on the right

12. Bleed lines on left and right in raised print

INTRODUCTION

Financial management involves the management of finance functions it is concerned with the planning, organizing, directing and controlling the financial activities of an enterprise it deals mainly raising funds in the most economic and the suitable manner using these funds as profitable as possible planned future development through financial account cost accounting budgeting statistics and other means.

- 1. The finance function mainly deals with the following three functions:
- 2. Investment Decision
- 3. Finance Decision
- 4. Dividend Decision
- Each of these function must concerned in relation to the objective of the firm.

INVESTMENT DECISION:

The investment decision relates to the selection of assets by a firm. The assets selection decision of firm one (or) two types. The first of these involving fixed assets is popularly known capital budgeting.

FINANCIAL DECISION:

In this function, the finance manager has to establish carefully the total funds required by the enterprise after taking into account both the fixed and working capital requirement in this contest the financial manager is required to determine the best financing mix or capital structure of the firm.

DIVIDEND DECISION:

The finance manager must decide whether the firm should distribute all profits or retain them. Distribute a portion and retain the balance.

In order to make these decisions rational the management must have a clear understanding of the objectives rational the management must have a clear understanding of the objectives, which are sought to be achieved. The growth of a business to a large extent depends on the current operations. So the working capital management, the liquidity position of the firm can be understood.

Demonetization and Its Impact on Indian Economy

Brief Introduction of Demonetization

On the evening of 8th November 2016, Indian Prime Minister Mr. Narendra Modi announced a sudden denomination of 0500 and 01000 rupee notes. Instead of RBI Governor Urjit Patel, surprisingly Prime Minister announced the news of demonetization that these banknotes would not be legal tender after midnight of the 8th November. means the high value notes will not be legal for transaction. Although the old notes can be exchanged till 31st December 2016. There were set an upper limit of cash withdrawals from bank is 0000 per day (up to 020,000 per week) per account and from ATM 02000 per day per account from 10 to 13 November which is changed from 14 Nov. to 024,000 per week from bank and 02,500 per day from ATM per account till 31st Dec., although a needy person can withdraw with valid reason.

According to RBI report on 31st march 2016, 0500 and 01000 banknotes consist around 86% of total cash circulation having value of 015.44 lakh crore. In this process 97% of old notes around 1214.97 lakh crore were deposited in bank before 31st December.

Motivation:

In last year, Demonetization was a major economic incident and a bold move by the government. As soon as the PM announced about demonetization, a debate started in the whole country. On the news channel, at the offices, everywhere everyone wanted to understand the effects of demonetization as it was not so obvious. I was also one of them who were interested, curious and excited about the recent event. I thought that I should understand the economic point of view of such a big event as economics student. All these things inspired me to dig into this topic.

Objective of the Study

The aim of this study is to study the previous instances of demonetization round the world. In these cases, what were the aims of the countries and what happened to them next, is also collected in the study to understand the possible outcomes of our demonetization to reduce the negatives and to maximize the positive ones by learning from the good decisions taken by the various countries as well as by the mistakes made by them. This study also takes the views of many other authors and collects them to make a perspective about the possible effects of the demonetization, explanation of them according the economics theories and suggestion made by them. One of the most important part of this paper is the one where broker's fee concept is used to explain the behaviour of people at the time of demonetization, and the effect of it further on savings and investment.

This study would help in understanding the cost benefit analysis of demonetization in India. This study would also help in finding out the sectors that are affected due to demonetization and appropriate actions could be taken by the government by modifying the policies accordingly. This study also shows the way to government to take the decision

Australia	1996	To the curb black money crisis and improve security features on the	Success
Britain	1971	notes To bring uniformity in currency	failed in other countries except Britain
Zaire	1990	A plan to withdraw obsolescent currency from the system	Failed
USA	1969	Due to black money	Success
Pakistan	2015	To get rid from Black Money, Counterfeit Currency	Messed Up
Germany	1923	Due to high domestic prices	Inflation fell
Philippines	2016	To preserve the integrity of currency	

Conclusion

Initially Govt's Objective was to curb black money but if we look at the figure, 97% of E500 and E1000 rupees' banknotes were deposited in banks and only 3% (.43 trillion rupees) black money scraped as undeclared income hence we can say a less part of Black Money is in cash so this action isn't effective to curb black money. However, Tax GDP ratio will increase in future. Due to demonetization counterfeiting currency market offhand shut down for a while but they have capability to create new notes' duplicate so we can say in short run their activity will be slowdown but in long run they can rebuilt their market and also it is easy to handle 2000 rupees notes instead of 1000 rupees notes in briefcase to giving bribe. In this study, we have found some important points about the short-term effects of demonetization as well as about the long-term effects by observing the previous cases of demonetization in other countries. We have to be alert and thoughtful to sustain our growth because many countries which have done demonetizations could not sustain the same. In short run, almost all the sector in the Indian economy have been affected negatively due to shorting of cash. However, in long-run Informal Economy would be formalize. So, government have to focus on informal economy and need to make appropriate policies for them. Other than this, we have got the point by using the Baumol's model in this case that the transactions were more difficult to make than it could be simply estimated by the ratio of money supply in demonetization period to the normal period's money supply.

Money supply reduction results to fall in interest rate and accessibility of loan will be easier as interest rate decrease. It will be helpful to new entrepreneur for their startup. After demonetization, Indian economy got the momentum towards Case less economy. Longterm effect of demonetization couldn't identify yet due to less availability of information set.

DECLARATION

We P. J. GOPAL, T. JEEVA, Y. KISHORE, S.G.KOMALA, K.KOTESWARAN hereby declare that the project report entitled "MARICO LIMITED " done under the esteemed guidance of Sri. K.G PONNAMBALAM, M.C.A Lecturer In Computers, Department of Computer Applications, Govt Degree College-Nagari is submitted in partial fulfillment for the award of the degree of Bachelor of in Commerce.

DATE : PLACE :

> SRI VENKATESWARA UNIVERSITY TIRUPATHI- 517501 2017-18 ACKNOWLEDGEMENT

A part from the effort of me the success of the project depends largely on the encouragement and guidelines of many others. I take opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project.

I would also like to thanks our **Principal Sri .Dr.R. RAJENDRA NAIDU**, **M.Com, P.h.D.**, who had been a source of inspiration and for his timely guidance in the conduct of my project work.

I would also like to show my greatest appreciation to Sri K. MANOHAR, M.Com, P.h.D., Head of Department of Commerce. I can't say thanks enough for this tremendous support and help. I feel motivated and encouraged every time I attend his meeting. With out his encouragement and guidance this project would not have materialized.

I wish to express my deep sense of gratitude to my internal guide Sri. K.G PONNAMBALAM, M.C.A Lecturer in Computers, for his able guidance and useful suggestion, which helped me in completing the seminar report, in time.

Finally, yet importantly, I would to express my heartfelt thanks to my beloved parents for their blessings, my friends/classmates for their help and wishes for the successful completion of this project

Preject Work

Name :- k. Sonia Group :- IInd B.Z.C. E/M Sub :- Botany, VI - paper Topic :- Terrestrial Ecosystem Roll No:- 06

-du

TERRESTRIAL ECOSYSTEM

- The term ecology was coined by Earnt Haecken in 1869.
- => It is derived from Gree words Oikos home + logos study.
- -y So ecology deals with the study of organisms in their natural home interacting with their surroundings
- the ecosystem is a self-regulating group of biotic communities of species interacting with one another and with their non-living environment exchanging enougy and matter
- => The cosystem is a unit or a system While is composed of a number of sub units, that are all directly or indirectly linked with cach other.

TERRESTRIAL ECOSYSTEM

Terrestrial ecosystem is a type of ecosystem found only on biomans. Six primary terrestrial ecosystems exist, tundra, taiga, temperate, deciduous forest, tropical vain forest. gross land and desent. In ecosystem is a self regulating with one another and with their non-living environment exchanging energy and matter. Terrestrial ecosystem found only on biomas

The various components of a terrestrial ecosystem are as -follows.

Abiotic Factors :-

The soil, along with the atmosphere is a store house of all elements. They enter into the body composition of the living organisms through the producers. The C, H, O, N, p and S required by plants are supplied by co, water, nitrates, phosphates and sulphates respectively. Besides them, the plant body also requires major element the kina, ca, Fe etc. and trace elements like ou, Zn , co , Mo etc. Biotic Components :-

The biotic component of terrestrial ecosystem include (a) producers (b) Consumers (c) Decomposers.

(a) producers: -

There are mainly the green plants, Which can synthesize their food themselves by making use of conbondioxide present in the air and water in the presence of sunlight by involving chloro-- phyll, the green pigment present in the leaves

through the process of photosynthesis . They are also known as photoautotrophs. plants produce their own hood. So they are called producers. plant diversity

In terrestrial easystem there are different types or different varieties are present Grasses, herbs, shrubs, trees these type of plants present in the terrestrial easystem. They produce their own food. So they are called tutotrophs. The green plants are also known as convertors or transducers. They convert the light energy into the chemical energy of the food materials. In our area, coconut, Tamerind, Mango these types of trees are large in number.

(b) Consumers :-

All organisms which get their organic food by teeding upon other organisms are called consumers.

These are herbivorous animals that feed on producers directly. They may be larger or microscopic Depending on their position in terrestrial the primary consumers are of the following types Examples of primary consumers.

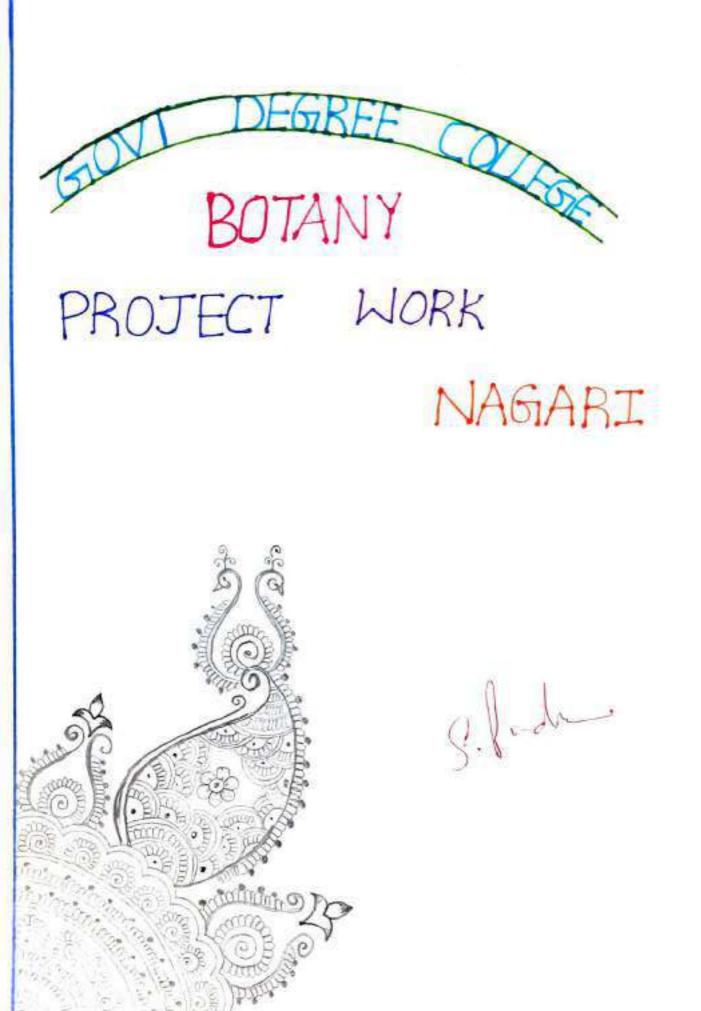

D Rabbit :- Rabbit is the primary consumers. It directly cats the plant. It is a plant eater. Rabbit is Herbivorous animal

3) Great :- Geat is also a primary consumers. It is also directly eats the leaves of the plant. It is a plant eater. Goat is a Herbivorous animal

3) Buffalo: Buffalo is also a primary Consumers. Buffalo is the biggest animal Compare with the above animals. It also directly eats the plant. Buffalo is also a herbivorous animal

FIELD TRIP OF CHEMISTRY

FIELD TRIP 2018 - 19

DYEING , WEAVING & WATER PURIFIER EACTORY

.

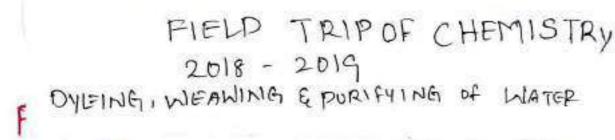

NAGARI

LEVEING :-

- * Dyeing is the application of dyes or pigments on textiles materials such as fibers yours and fabrics with the abjective of achieving calour with duried fastness (1) Dyring is normally done in a special solution containing dyes and particular Anomical material.
 - S' Dye moleulus are fixed to the fibre by absorption diffusion or bonding with temperature and time being by controlling Auctory.
 - * The bond between type molecule and fibre may be strong or weak depending on the dye wed.
- * Dyeing and printing are different applications i in printing colour is applied to a localized area with derived pattern and in dyieng it is

opplied to the entire textile.

-r -resplic -librou are dyed with basic dyes while hyton and protein fibere such as weak and silk are dyed with and dyes and polyster youn is dyed with disperse dyes.

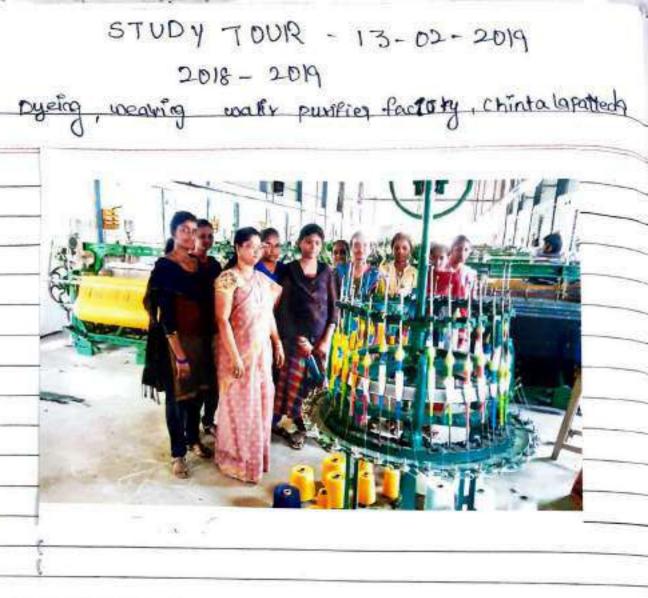

NEAVING 8-

x wearing is a method of textile production in which distinct sets of yours or thready are interlated it right angles to form a fabric, or lists.

- s other methods are knotting crocheling felting, and braiding or platting.
- it the longitudinal threads are called the warp and the lateral threads are the wett or filling. Ewett is an old english woord meaning that which is woven' compare leave and left 1912
- * the nucleod i'm which them threads one inter.
- women affects the characteristic of the cloth
- " cloth is wually booken on a loom.
- "The way the way and filling threads interlate with each other is called the wave. "The majority of noticen products are created with one of three basic becaus.
- r plain weaver. Satin weave or twill.

ACKNOWLEDGEMENTS

We are very much thankful to Dr.K.Aruna, principal of Government Degree College, Nagari for his continuous support.

We are thankful to S.Munwar., M.Tech., Head of the Department of B.Sc. Computer Science for his valuable suggestion through out the course.

We express sincere thanks to my faculty guide K.G.Ponnambalam., MCA., Assistant Professor who guided us constantly and shared infinite time and interest and helped us at all times to enable us carry out project with confidence.

We express my deep sense of gratitude and sincere thanks to my project guide Mr.M.Sharma, Sr. Software Engineer, Girgit Software., Mehdipatnam, Hyderabad, for his constant motivation and valuable help throughout the project work.

We would like to express our sincere gratitude to all faculty members, in Government Degree College, Nagari affiliated to S.V.University, Tirupati for their encouragement & suggestions.

We take opportunity to express our thanks to all friends and well wishers who provided all necessary information for the successful completion of the project.

Field Trip

2018-19

Brief Report on Field Trip

Onbehalf of the Dept. of Political Science the staff and the students of BA course visited Junior Magistrate and Civil Judge Court of Nagari as a part of Field Trip Program on 22-01-2019. We were visited the court aroud 11.30 am. We interacted senior lawyer in the court. He explained us about the court procedins and legal matters. Students were asked some doubts about the various panishments and the lawyer clarrified the doubts which were raised by the students.

No doubt the trip was enhanced the practical knowledge about the judicial administration. Students were got only theoritical knowledge by studying the subject but with this trip the students were practically understood the powers and functions of the judiciary.

A COMPARATIVE STUDY ON CUSTOMER SERVICES IN COMMERCIAL BANKS IN NAGARI TOWN

"A customer is the most important visitor on our premises. He is not dependent on us. We are dependent on him. He is not an interruption on our work. He is the purpose of it. He is not an outsider on our business. He is a part of it. We are not doing him a favour by serving him. He is doing us a favour by giving us an opportunity to do so."

INTRODUCTION

- Mahatma Gandhiji

During the last two decades the commercial banks in our country went through significant qualitative and quantitative changes and manifold growth in all business dimensions. The fast changing environment has been characterized by rapidly growing size, complexity, uncertainty and ambiguity. On the one hand, banks have to shoulder the social responsibility of taking a leading role in the balanced socioeconomic development of India, and, on the other hand, they are asked to be concerned about their level of profitability.

For the past few years, there has been a persistent trend toward financial sophistication and diversification. The dynamic process of development and diversification, coupled with structural, financial and technological changes, has led to an ever growing competition, not only among banks but also among non-banking institutions. With yields on deposits down, bank customers are going to turn to mutual funds and other high yielding financial services in a big way. The trend in profit on traditional banking is pointing downwards. Therefore, banks have to offer new high yielding financial services on a large scale.

In view of the above, it is high time that bankers realized the need to improve banker customer relationship and to anticipate, identify, reciprocate and satisfy their needs efficiently, effectively and profitably. For the above purpose, banks must utilize relevant marketing concepts to promote marketing orientation in planning, operations

and communication and modify existing strategies for attracting deposits on the one hand and quality borrowers and users of services on the other.

CONCLUSION

21st century banking has become wholly customer driven and technology driven. During the late decade technology has been dramatically transforming banking in India. The customers expect speed, courtesy and accuracy concern from the bank. These are the important aspects of customer service. Depositors being the main suppliers of credit, assess the quality of services. The banks are driven by the challenges of competition, rising customer expectations and shrinking margins. Banks have been using technology to reduce cost and enhance efficiency, productivity, and customer convenience.

ACKNOWLEDGEMENT

A part from the effort of me the success of the project depends largely on the encouragement and guidelines of many others. I take opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project.

I would also like to thanks our **Principal Sri .Dr. ARUN KUMAR, M.Sc, P.h.D.**, who had been a source of inspiration and for his timely guidance in the conduct of my project work.

I would also like to show my greatest appreciation to Sri K. MANOHAR, M.Com, P.h.D., Head of Department of Commerce. I can't say thanks enough for this tremendous support and help. I feel motivated and encouraged every time I attend his meeting. With out his encouragement and guidance this project would not have materialized.

I wish to express my deep sense of gratitude to my internal guide Sri. K.G PONNAMBALAM, M.C.A Lecturer in Computers, for his able guidance and useful suggestion, which helped me in completing the seminar report, in time.

Finally, yet importantly, I would to express my heartfelt thanks to my beloved parents for their blessings, my friends/classmates for their help and wishes for the successful completion of this project

LANDSCAPING

Introduction :-

- >> Landscaping may be defined as the use of plants outdoor to fulfill aresthetic and functional purposes.
- -> Landscaping is an activity in which beauty and function is determined by the customer
- -> It also involves control selection and strategic arrangement of plants.
- => It is a branch of floriculture which deals with the study of ornamental gardening er gorden features.

-> Goals of Wandscaping :

- r Enhance the aesthetic appeal of an area 2. Enhance the neighbouring and increase property
- value. 3 Blend architectural creations into nataral scenery.
- 4 create recreational grounds
- 5 Modify Environmental factors.
- 6. provide privacy by shielding public from backyands, pations etc.,

Land scape Gardening :-

⇒ Tringing an area or piece of land into a garden by utilizing naturally existing features like undulations, terrares and plain surface so as to look to have more naturalistic effect than artificial in orcles to imitate nature.

⇒ Before any actual gourden work is undertaken, a master plan has to be prepared according to scale (1:15 or 1:20) in which all the features such as house wall, drive way, paths, flowen beds, shrubbery etc are plotted.

The shaded areas due to large bree canopy or the building itself have to be manked on the plan. Itself have to be manked on the plan is of A plan prepared on a printed graph poper is of great help.

>> The plan thus prepared should be studied again and again keeping in view whats shape a plant

will take in the long run. It is trequently observed that people attracted by It is trequently observed that people attracted by the graceful form of a young Arouccuric cockis the graceful form of a young Arouccuric cockis plant this in the centre of a lawn or naconthe house, plant this in the centre of a lawn or naconthe house, plant this in the centre of a lawn or naconthe house, plant this in the centre of a lawn or naconthe house, plant this in the centre of a lawn or naconthe house, plant this in the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant this of the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant the centre of a lawn or naconthe house, plant the centre of

It will attain atter sorregeors. > perhops the owner of the house will cut this tree when overgrown or it may be relained to the detriment of other plants growing below it, Either way , this is not a good planning.

REPORT ON INDUTRIAL VISIT TO ISRO SDSC SHAR

An industrial visit to SDSC-SHAR (ISRO). Sriharikota has been organized by Department of Chemistry and Physics. Govt. Degree College, Nagari for 75 students of B.Sc II & III year on 3^{ad} February, 2020, who were accompanied by faculty members.

OBJECTIVE :

The objective of the visit was to provide a Technical Exposure to the students about Space Technology and advancements in Technology. The visit not only provided a good nsight into the quality of research happening in the area of space technology but also gave treat exposure to the students about the future career prospects and areas of research in upplied sciences.

ABOUT ISRO AND SDSC SHAR:

ISRO is the primary space agency of India and one of the largest space research organizations in the world. SATISH DHAWAN SPACE CENTRE (SDSC) or SRIHARI KOTA HIGH ALTITUDE RANGE (SHAR) is a rocket launch centre operated by Indian space research organization (ISRO). It is located in Sriharikota in Andhrapradesh. The Sriharikota range has been chosen for its proximity to the equator and to use the rotation of the earth .It is close to lake PULIKAT and it is about 100km north of Chennai and close to the BAY OF BENGAL.

SUMMARY OF THE VISIT:

One bus with students started from Nagari at 4:00 A.M. on 03/20/2020 and reached suburpet, a near by town to ISRO at 8:30 A.M. where accommodation was provided to the adents and faculty at Kinnera Grand Inn hotel. After Breakfast, we started to ISRO SDSC Cratre and reached there by 10.30. A.M.

After several security checks and administrative formalities, Students were taken to a testral building. In this place, they were shown a video – 'Gateway to Space' – on the ISRO, is history, and the current facilities available.

THE 'GATEWAY TO SPACE VIDEO'

ī

The GSLV and PSLV are the two launch vehicles used currently by ISRO to launch satellites into the geosynchronous and polar orbits respectively. The GSLV has 3 stages – the first is a solid (fuel) stage, the second a tiquid (fuel) stage and the third is a cryogenic stage. The satellites launched so far have applications such as National development/infrastructure, telecom, disaster warnings, resource management, etc.

The PSLV can launch multiple satellites simultaneously at a low cost and high reliability. The various facilities at SDSC were listed and their functions are explained in brief. Weather prediction is another important factor at the time of launch, and the SHAR boasts of this facility too. The latest addition to the SDSC was the S200 propellant plant. The strap on motors, their dimensions and use were elucidated.

The countdown begins at (t-57) hours. At this time, the liquid propellants are filled into the system. At (t-16) hours, the mobile service car is withdrawn and the system is connected to the Launch and Mission control centre (which are placed 6km from the launch site) through electrical wires only. The cryogenic fuel is set around the launch site. The performance is monitored in real time. At about 17 minutes after blast off, the GSLV completes the mission – puts the satellite in geosynchronous orbit.

After this, students were taken to several locations within the SDSC, with a guide to explain the locations.

SECOND LAUNCH PAD

This is the location that we see every time a launch is broadcast on television. The rocket is assembled and brought to the launch pad. The rocket is electrically insulated from lightning by 4 lightning protection towers. These towers also house high resolution cameras at several levels to monitor the various stages of the rocket. These cameras are protected by concrete enclosures. The launch pad itself is about 70m high. This means that the protection towers are even taller. An anchor is present to hold the rocket in place until the time of blast off.

Separate pipes are present to deliver cryogenic fuels, which are supplied at 180 degrees Celsius. Finally, there are exhaust deflection ducts which deflect the exhaust gases through underground tunnels to a place which is a few tens of metres away. In case the flame returns to the rocket, balance will be lost and the rocket may topple. The tunnels are filled with water to reduce pressure and temperature. Also, cryogenic fuel tanks are available in separate towers. Each floor in the launch pad is 4m high. This launch pad is called 'umbilical' due to the presence of the pipes which feed fuel to the rocket.

FIRST LAUNCH PAD

Unlike the 'umbilical' type, this is a pedestal type. The whole tower moves away from the rocket just before the blast off. As there is a PSLV launch in the next month and that process was taking place at the time, entry was denied and we were allowed to see this from a distance.

MISSION CONTROL CENTRE

The mission control is the focal point of controlling the vehicle. There are 8 'hold buttons' at different places around the range. In case of abnormalities in subsystems (affecting the health of the rocket), the hold button is used to terminate the countdown. In case the abnormality has been resolved, the first row is used to supervise the control of the launch vehicle. The second' and third rows control the operations on the vehicle. Various chiefs of operations are seated in these rows. These computers are connected by Ethernet and fibre optics.

There is a separate ring safety server which is controlled by a senior scientist. In case of abnormalities in the path of the rocket, this person can detonate the rocket so that the rocket is blown up over the sea and does not affect neighbouring human population. There are 45 levels of information relating to the launch of the rocket. The vehicle Director authorises the launch at (t16) minutes. An automatic sequence program checks the health of the rocket (with respect to various parameters) and ensures that any deviations in the parameters are within specific limits.

MUSEUM AND LIBRARY:

We visited the Space Museum and the Library facility at SHAR. Here, we were allowed to take the Photographs, where we got an opportunity to know about the History of SHAR with the aid of many models related to the centre.

ASSEMBLY AND STATIC TEST AND EVALUATION COMPLEX

- Two buildings constitute the complex the assembly building and the test buildings which
 are placed adjacent to each other. Motors which are in excess of 2m diameter are present
 and they are fabricated in Mumbai.
- Several tests are done on a launch vehicle, such as vibration test, centrifugal test, and static test. Of these, only the static test is done in SHAR. There are two kinds of static tests – ballistic test and the other is to optimize insulation. After assembly, the motors are tilted horizontally and they are integrated to floating members. From a calibration curve, the strain is converted to thrust and the motor is characterized. Flexible nozzles of the strap on motors are also tested on this test bed.
- At around 2.15. P.M., we had lunch at ARYABHATTA canteen facility at SHAR. After having our Lunch, at around 4.30 P.M., Mr. Surendra, Scientist/Engineer-SF, Dy.Head, Systems Reliability Entity, has addressed the students with all the technical information related to SHAR. At 5.45 P.M., we moved back to Nagari.
- We (all students) are very much thankful to Principal and Staff members of Govt. Degreee College, Nagari for giving their valuable support.
- We are also very much thankful to Shri.V. Surendra Scientist/Engineer-SF, Dy.Head, Systems Reliability Entity & other staff for their co-operation during the visit.

Signature of Lecturer

Date: 31-01-2020

From. Department of Physics. Govt. Degree College, Nagari – 517 590 Chittoor Dist.

To,

The Principal, Govt. Degree College, Nagari, Chittoor Dist.

Sir,

Sub - Permission for visiting SDGR SHAR - Department of Physics - GDC Nagari - Req - Reg.

Ref. GD/MSG/17/2020 dated 27-01-2020 from Satish Dhawan Space Centre SHAR, Nellore Dist., A.P.

····· lar

In the reference above cited they given permission for visiting SDSC SHAR Facilities on 03-02-2020. So I request for you sir, please give permission for visiting SDSC SHAR for the purpose of filed visit. The Student and Staff list is attached here with.

A8. 201

Thanking you sir,

Yours faithfully,

NAGARI EIZEGO CHITTOGEOLIAE)

January 27, 2020

Sub: Permission for Visiting SDSC SHAR Facilities – Regarding.

This has reference to your email/letter with above subject. In this regard, kindly note that you may visit the Centre as per the date and time given below:

- Approval Ref.No.
- Date of Visit
- Reporting Time
- * No. of Persons Permitted
- : 069/2020
- : 03.02.2020 (Monday)
- : 09:00 Hrs
- : Max. 65 only (Including Staff & Vehicle Crew)

For B.Sc PhysicsStudents

Kindly confirm your visit either by Fax 08623-225576 or e-mail: <u>ppo@shar.gov.in</u>. If no confirmation is received (along with the visitors list) from **Government Degree & P.G College, Nagari** on or before 31.01.2020, we presume that you have dropped your programme.

Please go through the General Guidelines printed over-leaf for further details.

For any queries/help, please do not hesitate to write/contact us (Ph.No. 08623 - 226104/e-mail: ppo@shar.gov.in).

Wishing you a happy visit.

With regards.

(P. Gopi Krishna) Group Director, MSG

To The Principal Government Degree & P.G College Nagari- 517 590

FIOME ECONOMICS - A SURVEY

Introduction :-

In the Present day society the family expenditure is growing manifolds. Each and every family is sponding their incomes on various items inrespective of their status. Each family has to plan their expenditure depending upon their incomes on these items on priority basis. Abrinally all households spend their major incomes on food, clothing, education, medical expenses etc., in this order.

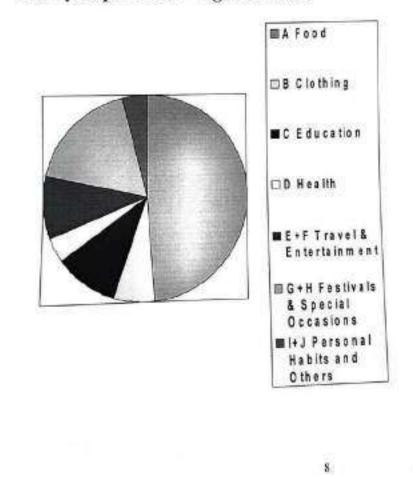

Hence this study focuses on the expenditure pattern of the householde belonging to different occupations. However for the purpose of the convenience these occupations have been grouped into three. major groups on macro - basis.

Objectives of the study :-

(1) This study aims at identifying different items of family expenditure.

C=education D=health E+F=travel and entertainment G+H=festivals and special occasions I+J=personal habits and others

NOTE: The above data is presented in the form of pie diagrams.

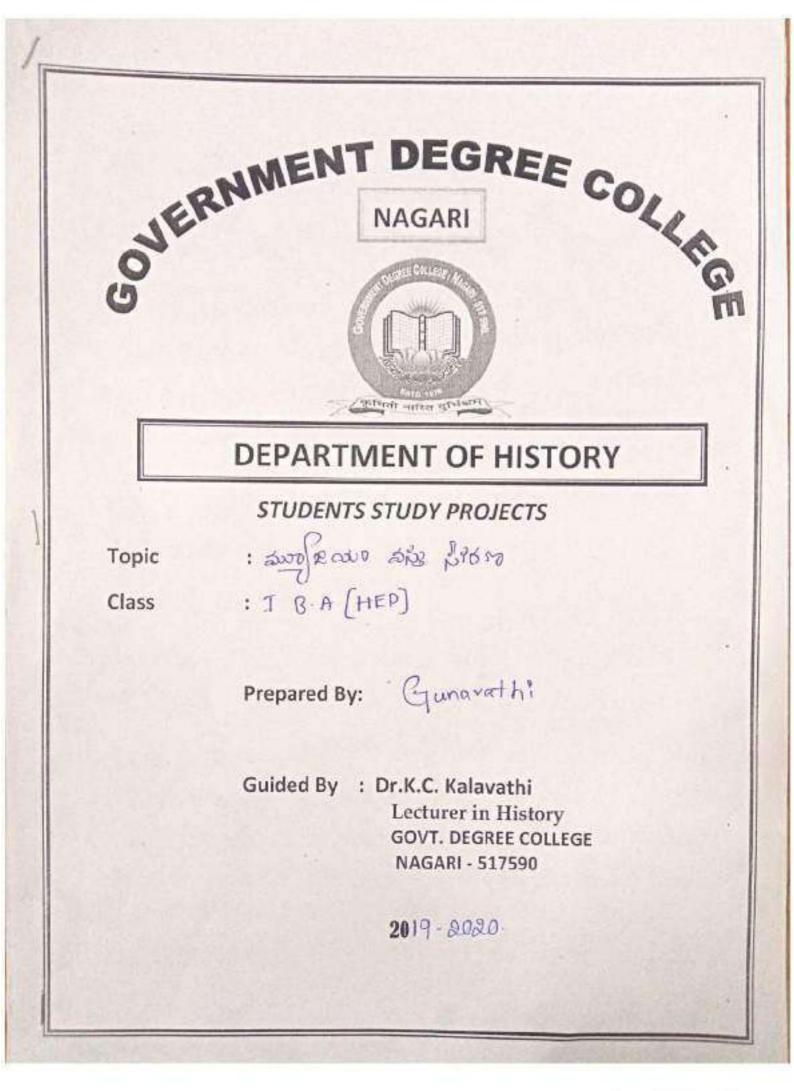

Family Expenditure - Agriculturists

Brief Report on Field Trip

On behalf of Dept.of political science the staff and the students of BA course visited "SHAR" rocket launching centre at Siharikota, Nellore district on 03-02-2020 as part of field trip program. We were starting from Nagari around 6 am and reached Sriharikota around 11 am. Of the same day(03.02.20)

We were met the scientists who are working in the SHAR centre and they explained about the process of rocket launching and how to how the rocket taken away the satellites into orbit.We also visited the rocket launching pad station. We were astonished about the advancement of India's space technology.

DECLARATION

We R AGUSTIN (0218009001), K APPU (0218009002), P BALAJI (0218009003), A R BALAJI (0218009004), KEESALAM BALAJI (0218009005), K P BALAMURUGAN (0218009006), to hereby declare that the project report entitled "AMARA RAJA BATTERIES LIMITED " done under the esteemed guidance of Sri. E. Murali Mohan Reddy, M.C.A Assistant professor, Department of Computer Applications, Govt Degree College-Nagari is submitted in partial fulfillment for the award of the degree of Bachelor of in Commerce.

DATE : PLACE :

> SRI VENKATESWARA UNIVERSITY TIRUPATHI- 517501 2019-2020

ACKNOWLEDGEMENT

A part from the effort of me the success of the project depends largely on the encouragement and guidelines of many others. I take opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project.

I would also like to thanks our **Principal Dr. ARUN KUMAR, M.Sc, P.h.D.**, who had been a source of inspiration and for his timely guidance in the conduct of my project work.

I would also like to show my greatest appreciation to Sri K. MANOHAR, M.Com, P.h.D. Head of Department of Commerce. I can't say thanks enough for this tremendous support and help. I feel motivated and encouraged every time I attend his meeting. With out his encouragement and guidance this project would not have materialized.

I wish to express my deep sense of gratitude to my internal guide Sri. E. MURALI MOHAN REDDY, M.C.A Asst.Professor, for his able guidance and useful suggestion, which helped me in completing the seminar report, in time.

Finally, yet importantly, I would to express my heartfelt thanks to my beloved parents for their blessings, my friends/classmates for their help and wishes for the successful completion of this project

Biodiversity:-

Introduction:-

* The term Blodwerstly was first coined by The entomologist E.O. Wilson in 1986. * Blodwerstly is the heritage of million of years of evolution. * Diversity is a basic property of life. * The stalking feature of Earth is the existence of Life and the stariking feature of Life is its Diversity.

Definition:

* Blodiversity Chological diversity) is The Total sum of all the Living organisms That exist on our earth. * This Living wealth is The product of hundreds of millions of years of evolutionary history. * The variability among Living organisms from all sources including terrestorial, movine and other avuatic ecosystems and the ecological complexes of which They are a parts: This includes diversity within species between species and of ecosystems International convention on Biological diversity.

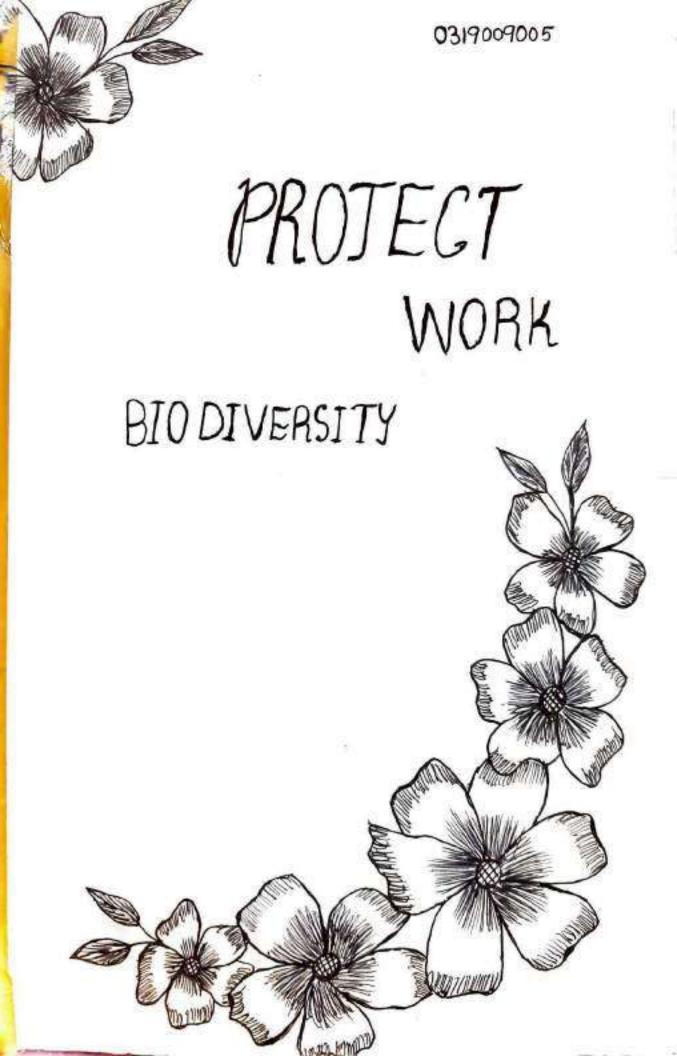

Impostance of Blodiversety:-

* Blodeversity is a broad Lenm for biological variety and it can be measured at a number of organizational Levels.

* However, blologists are using measures of bio--diversity at several levels of biological organi--zation CIncluding genes, populations, and ecosystems) to hop focus efforts to preserve The biologically and technologically important elements of biodeversity *Economic -biodeversity provides humans with maw materials for consumption and production.

* Many Livelphoods, such as Those of farmers, Fishers and Timber workers, are dependent on blodiversity.

* teological life support - teodeversity provides functioning ecosystems That supply oxygen, clean air and water, pollination of plants, pest continul, waste water treatment and many ecosystem services. * systematic ecological data That help us to understand The natural world and it's origins. * our tourism industry also depends on brodeversity.

Biodivensity Definition

"Biodiversity is the variation among living Organism. from different sources including towestaial, maxime and desert ecosysteme, and the ecological complexes of which they are a part "

What is Biodiversity:-

Biadiversity describes the sichness and variety of life on earth. It is the most complex and impostant fiature of our planet. Without biodiversity, life hould not Rustain.

The team biodiversity was coined in 1985. It is impostant in natural as well as artificial ecosyden It deals with nature's variety, the biosphere It reters to vagiabilities among plaste animale and

micaologanizme species

Biodiveasity includes the neember of different organism and their relative frequencies in an ecosystem. It also sofficie -16 0-ganization of Osganisme al different levols.

- * Biodiversity holds ecological and economic significance. * It provide us with nowaishmont, howing. fuel, 'Clothing and several other secondarce. * It also extracts movelary benefits through townism. * Therefore. It is very important to have a good knowledge of biodiversity for a sectainable livelihood.
- Flagship species :tagship species is a species that is used as a ambas sadoa, symbol oa icon toa a defined abitat, environmental Cause Oa Compaign.

TOPIC - Land scaping

Introduction

Land scaping is the process of making of garden or land more atthactive by desiging adding ornamental features and planting trees and shurbs.

The planning of garden is an art. A garden architect should learn enough of geobgy geography all should have profound knowledge about plants. Land scaping has huge impact on the Overall look and feel of home or place and it can improve resale value too. The land scaping style we choose should allow your yard to be a place where you can go to relax and decompress from the rest of the world.

when Choosing a type of land scaping design, keep in mind your ultimate goals such as designing your yard for children, sustainability entertaining or relaxation. Fasic Minciples of Landscape design :-There are 8 basic princles in Landscope design Durity:-

Unity in landscaping is the repetition and Consistency of a design. Repetition is used to bring about Unity in your design by repeating like plants and decor in the land scape. Consistency is used to Create Unity by fitting different elements 2) Balance:-

Balance is simple a sense of equality there are two types of balance in design: symmetrical and asymmetrical balance. In symmetrical two sides of land scape are identical while Asymme -trical, the land scape composition is balanced by using different elements and objects. 3) Contrast and barmony:-

contrast helps highlight certain elements in your design while harmony helps elements in a land scape compisition look unified. 4) <u>Colour</u>:-

Colour gives your land scape design the dimension of real life. Warm colours seem to advance towards you, making an object seem closer while cool colours like blue and greens seem to move away from yoy.

Introduction Landscaping

* A landscape is the visible features of an area of land, its landforms, and how they integrate with natural or man - made

Features, * A landscape includus the physical elements of geography physically defind land forms such as mountain, hill, water bodies such as reviews, laters, ponds and the sea, living elements of land cover including indigenous vegetation, human elements including different forms of land use, buildings and Bhructures, and transitory elements such as lightings and weathers conditions.

* landscape can be as varied, formland, a landscape park and wilderness.

* The earth as the vast range of landscape, including the icy landscape of polar regions, mountain landscape, Forested, wooded landscapes, clucking past borcal forests, and tropical rainforests and agricultural landscape of tempenature and tropical regions.

* The activity of modifying the visible features of area of land is referred to as landocaping.

cultural landscaping

Definitions:-

* As defined by the national park service, a cultural landscape is a geographic area, including both cultural and natural resources and the willdlife or domestic animals therein, associated with a historic event, activity, or person or exhibiting other cultural or asphetic values.

* There are but general types of cultural landscopes, not maturally.

Enample of cultural landscopping:-

* Include designed landscoping (Formal gardens and parks) * reited or vernacular landscaping (sheep ranches). cultural landscaping (characteristics):-

* This paper starts from the natural and human elements composing of runal culture landscape, discusses the type both in material and non-material landscope of mural culture landscape, and summerizes six basic charecteristic of traditional neural culture landscripe in china: - centuresality and Complexity.

Importance of cultural landscaping:-

* Through their form, features, and the ways they are used, cultural landscopes, reveal much about our cuoling relationships with the natural world.

* They provide, seenic, economic, ecological, social recreational and educational opportunities which help includes, communities and nations understand themselves.

natural and cultural landscape:-

* The cultural landscape is fashioned from a

ratural landscope by a cultural group.

* Culture landscope is the result (Sawn 1925) This implies that culture and nature are not multially exclusive, and that cultural landscape do not have to be entirely human created.

landscape affects culture: -

* Landforms night include physical features like mountains or oceans.

* IF you live in the mountains, your likely to dwelop a particular culture that adapts to life at a high altitude.

* for example, you might wear heavin clothing and bend to be physically stronger as a result of elimbing often. Roads.cultural landscapes:-

* Different catigories of these ways can be distinguished read landscoping can be recognized as cultural heritate, cultural hiritage objects functionally related or unrelated to the road can exils in its surnouncling environment, and roads can also be treated as cultural heritage objects in landscope.

1. SUMMARY OF TEST PRINCIPLES AND CLINICAL RELEVACE. A. TOTAL Cholesterol:-

Chokstered is measured enzymetrically in serum or plasma in a series of Coupled exactions that hypholyzed cholestered esters and exidize the 3-off group of cholestered. One of the exaction hyperoducts. HeD2 is measured quantitatively in a providese codalyzed exaction that produces a color. Absorbance is measured at soo non. The educe intensity is proportional to cholestered concentration. The decision Sequence is as follows.

Cholesterryl ester + H20 -----> Cholesterrol + fatty acid. cholesterrol 0xidase. cholesterrol + 02 -----> cholest-4-en-3-one + H202

B. Triglycevides:-

C. High density lipoportein (HDL) Cholesterol.

Low secure concentrations of HDL - cholosterol are associ ated with increased risk for CHD cornerary risk increases marketly as the HDL concentration decreases from 40-to 30 mg/dL . A low HDL - cholesterol concentration is considered to be a value. below \$35 mg/dL. and high HDL 260 mg/dL. HDL - cholesterol values are also Used in the calculation of LDL - cholesterol.

HOL-cholestery l'esters peg-cho-ent. HOL-unestervisited cholesterol + fatty acid.

D. LDL - cholesterol.

Most of the circulating cholestool is found in these major upoprostein fractions, very low density. Upoproteins . Low and the L.

LOL-cholesterol is calculated from measured values of total cholestool, trigly cerides and fIDL - cholesterol according to the subtionship.

where. (TG)/s is an estimate of VIDL - cholestap) and all values are expressed in mg/12.

CASEIN AND CHOLESTEROL VARIANT IN

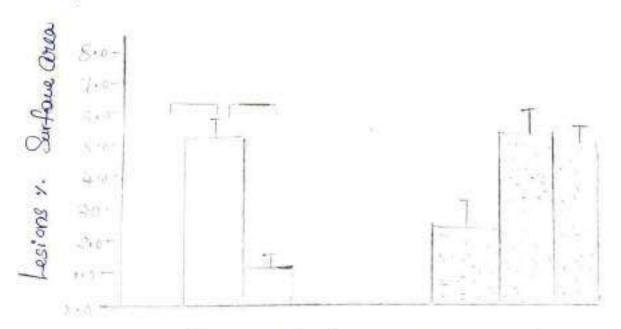

Introduction :

Cow milk constitutes a major part of the dief of developed nations and it Contains an average 32 g of protein per. litre 10 mostly Case in say and whey 18x. The Caseins have been divided into four Sub classes ds1, as & B and k [2,3], whose major function is to transport Calcium phosphate (4). B-case in is the Second most aburidant Case in behind Xs1 (1) and is essential for curd formation and important in dertermining the Surface properties of micelles is. to date logenetic variants of B- Casein have been characterised with regard to sequence (5,6], and of these only A', AR, A3 and B are found in nearly all Bos taurus populations [1,8]. The allelic distribution of Variants is Such that the majority of cows in western nations produce milk rich in the genetic Variant B - Casein A'. For example, Holstein and Ayrshire byreeds of Cow produce 63 and 67% A', respectively, and 35 and 33% AR DI In Contrast the Guernsey breed produces 11. A' and 98.1. AR. Alignment of B- Case in Al and B- Case in A? purtien

that in the absence of dietary. Cholesterol there was a slight, but not significant increase in neointimal thickening in Genoup & rabbits (10 y. B- Case in A) Compared with Group 3 (10 y. B Case in A2) and Group 1. Likewise the genoups fed 5, 10 and 20 y. B-Case in A' plus 0.5 y. Cholesterol had thicker neointimes than Genoup 1. Groups fed 5, 10 and dor. B- Case in A? plus 0.5 y. Cholesterol had thinner neointimes than their B- Case in A' Counterparts,

There was no neointimal thickening observed in any of the Contralateral uningured Carotid anteries.

Percent luminal Surface area of anta Coverd by lipid - filled lessons. Note that in Group I there were no areas of Irpophilic Staining

1.1 INTRODUCTION TO PROJECT

The objective behind developing Traffic offence through online Challana is to save the customers time and money in the process of challana payments Compared to those incurred from attending as manual.

In this system Employees can add the fines to the customer based on the offence. Customer can check his challana status by entering vehicle No and he can pay the fine amount through credit card.

Features include

- Provide rich user interface and secure registration.
- The Employees information files can be stored in centralized database which can be maintained by the system.
- Data Reports.
- Maintenance of profile details of the employees, and retrievals as and when required.
- Customer Challana Details.
- Customer Challana Payment Details.
- Vehicle Registration Details.
- Authentication is provided for this application. Only registered users can access

Organization Profile

Software Solutions is an IT solution provider for a dynamic environment where business and technology strategies converge.

Their approach focuses on new ways of business combining IT innovation and adoption while also leveraging an organization's current IT assets. Their work with large global corporations and new products or services and to implement prudent business and technology strategies in today's environment.

VS Infolink's Range Of Expertise Includes:

- Software Development Services
- Engineering Services
- Systems Integration
- Customer Relationship Management
- Product Development
- Electronic Commerce
- · Consulting
- IT Outsourcing

We apply technology with innovation and responsibility to achieve two broad objectives:

- · Effectively address the business issues our customers face today.
- Generate new opportunities that will help them stay ahead in the future.

This approach rests on:

- A strategy where we architect, integrate and manage technology services and solutions - we call it AIM for success.
- A robust offshore development methodology and reduced demand on customer resources.
- A focus on the use of reusable frameworks to provide cost and times benefits.

They combine the best people, processes and technology to achieve excellent results - consistency. We offer customers the advantages of:

Speed:

They understand the importance of timing, of getting there before the competition. A rich portfolio of reusable, modular frameworks helps jump-start projects. Tried and tested methodology ensures that we follow a predictable, low - risk path to achieve results. Our track record is testimony to complex projects delivered within and evens before schedule.

- User Friendliness is provided in the application with various controls provided by system Rich User Interface.
- 2. Provides secure registration and profile management of all users.
- 3. It provides online challana payments through credit card.
- 4. It can be accessed over the Intranet.
- 5. Customer can check his challana status.
- The Employees information files can be stored in centralized database which can be maintained by the system.
- Authentication is provided for this application. Only registered users can access.
- Report generation feature is provided to generate different kinds of data reports.
- 9. This system is developed by using web services.
- 10. In this system communication provided between users through email.

GRAMPANCHAYAT SYSTEM

ABSTRACT

Generally with the advance of the technology the burden on the user is reduced. By this a lot of time is saved for the people. Generally people have to go to the panchayat office in the villages for notifying their problems. This normally consumes lot of time and burden on the person. In this paper we are going to eradicate the drawback which is occurred in the existing system by simply notifying the problems in online and they can know the status easily via online.

EXISTING SYSTEM

Generally in villages the people have to visit panchayat system for sharing their rural problems to the president. There is no guarantee that the president can take their problems. The villagers don't know the president is present or not at the time they go to the panchayat office. This generally increase burden on the user. If they have an important work they have to postpone their work thus causes time wastage.

Disadvantages

- A lot of time is wasted.
- Burden on the user is increased.

PROPOSED SYSTEM

. In this paper we are going to eradicate the drawback which is occurred in the existing system by simply notifying the problems in online and they can know the status easily via online. By this they can complaint their problems to the

president at any time. They can view the status of the complaint. They may or may not give suggestions to the president for the work which is going on the village. All these actions are view by the admin.

Advantages

- A lot of time is saved.
- This generally reduces burden on the user.

ABSTRACT

A city is a large settlement. Cities generally have extensive systems for housing, transportation, sanitation, utilities, land use, and communication. Their density facilitates interaction between people, government organizations and businesses, sometimes benefiting different parties in the process. In existing system people face so many problems about job search and travelling information. At that they don't know which company has vacancies and which conduct interviews. The people who want to know about these details they went each and every company and talk with someone on that company finally get all those details its take lot of time. If the people want to go from one location to another location this situation also face so many problems. If the people who are new that city they don't know about bus number and which bus going to from where to where to overcome all these problems we go for proposed model. The main aim of the application is to build a website. In this web application we are providing job search and travel services of a particular city.

Determination of dispersive Power of different materials of the Prism

By

A. JYOTHIKA III BSc MPCs (E.M)
 M. AASHIQ III BSc MPCs (E.M)
 J. VINOD III BSc MPCs (E.M)
 P. VINOD III BSc MPCs (E.M)

Guided by M. RAJASEKHAR Department of Physics

2020-21

DISPERSIVE POWER OF THE METERIAL OF PRISH

with we that the same the Aim To determine the dispersive fower of the meterial of the stillener Prismy using spectromoter.

alass prism, spectrometer, mercury vapour lamp, spirit level, seadinglens with touch light

formula: The dispersive power of the meterial of a prism is,

$$W = \frac{-46 - 27R}{-4 - 1}$$

where, $\mathcal{M}_{B} = \operatorname{Retractive index of blue epectrol line$ MR = Retractive index of red spectral line

The refractive index for a specific colour is,

$$\mathcal{H} = \frac{\operatorname{Sim}(\frac{A+Vm}{L})}{\operatorname{Sim}(\mathcal{H}_{L})}$$

A = Angle of the prismwhere, Dr = Angle in minimum deviation in the prism Gos specific colour

Procedure: The primary adjustments of the spectrometer ave made. The experiment is performed in two points.

(i) Determination of angle of the Prism -

In order to determine angle (A) of the prism, the prism is placed on the prism bable with the verter I as no towards the collimator of the spectrometer as shown in

figure (i).

the prism. The light gets servacted at Ae and emerges out through Ac in a direction bending towards the base ac now, the telescope is adjusted to as boriew the spectrum in its field of view. Observing the blue line of the spectrum through the telescope is roboted clowly until the vertical cross wire coincides with the blue line of the spectrum. The reading on the circular scale is noted. The readings should be taken on the two verniers is and Vie the experiment is repeated with different alours of the spectrum and in each are the reading on the circular scale are noted.

201

The prism is taken out and the belescope The prism is taken out and the belescope is "is brought in line with the callimator. Inference

we have conducted the experiments with different pousing whether wade up of different meterials such as crownglass, Flint-glass, The most denseglass.

The dispersive power of Crowinglass is = 0.0150 The dispersive power of Flantglass is = 0.0298 Flant The dispersive power of deusciglass = 0.0399

the most dispersive power of the most dens flant glass = 0.0399

So we concluded that the most dense Flintglass has the more dispersive power.

A Project work on

"FINDING BEST DETERGENT USING SURFACE TENSION TECHNIQUE"

Abstract

When a detergent added to water, it reduces surface tension of water. Water can then easily enter into the pores of a cloth and can remove the dirt from inside the cloth. Then its cleaning effect will be better. The more is the lowering of surface tension of water by a detergent then better is its cleaning effect.

A liquid with less surface tension will raise a lesser height in a capillary tube of a given bore. Different solutions of same concentration are taken and the rise in same capillary tube is measured in each case. One which raises the least has the lowest surface tension. The detergent forming that solution has the best cleaning effect. A study is undertaken to find the best detergent among the available samples. Four detergent solutions of same concentration are selected and their surface tensions are determined.

INTRODUCTION:

Surface tension is the property of the liquid which makes the surface area of the liquid minimum. A free liquid surface acts as a stretched elastic membrane. Due to this a liquid having high surface tension, liquids can rise or lower in a capillary tube. Capillary tube is a glass tube having a uniform bore of radius about 1mm, the liquid with less surface tension will rise a lesser height in a capillary tube. This principle is used in our present project.

The surface tension of a liquid can be determined using the given formula (for the narrow tubes)

$$T = \frac{rdgh}{2}$$

Where r = radius of capillary tube h = capillary rise d = density of the water= 1.0 g/cc g = acceleration due to gravity=980 cm/s²

MATERIALS REQUIRED:

Capillary tube fitted with a twice a bent pin, retort stand, traveling microscope, clean water in a beaker, four available different detergents, four beakers, physical balance and weights.

METHOD (CAPILLARY RISE METHOD)

Clean water is taken in a beaker and capillary tube is dipped in the water such that, the tip of the pin just touches the water surface. With the help of traveling microscope, the capillary rise in the tube 'h' is determined.

Equal masses of different detergents are taken in different beakers. These detergents are dissolved in equal volumes of distilled water in different beakers. With the help of traveling microscope, the capillary rise of different liquids in the capillary tube is determined separately. The readings are tabulated in tabular-1.

The capillary tube is taken out from the beaker and is arranged horizontally to the retort stand. With the help of traveling microscope, the internal radius of the capillary tube is determined. The readings are tabulated in table-2. The surface tension of different detergents can be calculated using the formula given below

 $\Gamma = \frac{\text{rhdg}}{2}$

RESULTS AND DISCUSSIONS:

	internal radius (r) of capillary tube:
Determination of	internal factors (1) or copro-

Traveling m	icroscope reduing	Internal	Internal radius
Top end of inner circle of capillary tube R ₁ (cm)	Bottom end of inner circle of capillary tube R ₂ (cm)	diameter D= $R_1 \sim R_2$ (cm)	r = D/2 (cm)
	2.246	0.122	0.061
	7,640	0,120	0.060
	Top end of inner circle of capillary	Top end of finitefinitecircle of capillarycircle of capillarytube R_1 (cm) R_2 (cm)2.1242.246	Top end of inner circle of capillary tube R_1 (cm)Bottom end of inner circle of capillary tube R_2 (cm)Internal diameter $D=R_1 \sim R_2$ (cm)2.1242.2460.122

Average radius of capillary tube: 0.0005 ch

Table.2

S.No	Name of	Quantity	Quantity	and the second sec	eling be reading	Capillary raise	Surface tension
	the detergent	of water (ml)	detergent (gm)	At the meniscus R ₁ (cm)	At the pin tip R ₂ (cm)	h=R ₁ ~R ₂ (cm)	T (dyne/cm)
1	Pure water	100	5	3.729	1.204	2.525	74.85
2	Surf excel	100	5	3.609	3.080	0.529	15.68
3	xxx	100	5	3.390	2.380	1.010	29.94
4	Challange	100	5	3.365	2.610	0.755	22.38
5	Rin	100	5	3.392	2.570	0.822	24.36

Determination of surface tension

Table 2 shows the surface tension values of different detergent liquids.

CONCLUSION:

From the values obtained in the table2, it is clear the capillary rise and the corresponding surface tension calculated is less for the detergent "Surf excel" when compared to the other detergents under consideration. Hence "Surf excel" is the better detergent among the detergents under consideration.

2020-21

Brief Report on Field Trip

On behalf of Dept.of political Science, the staff and the students of BA course visited the municipal office, Nagari on 17-08-2021 as part of "Field Trip" program. We reached the municipal office 11 am of the same day.

We were met the commissioner, municipality, Nagari in his chamber in the office. The commissioner received us with pleasure. The staff introduced the students to commissioner name by name. Then we interacted with the commissioner about the administration in the municipality and students were clarified some doubts regarding the powers ,functions and resources of municipality from the commissioner. He also disclosed about the 74th Amendment Act which was enacted for urban governments. We were very much interacted with the commissioner's interaction.

No doubt the field trip was to enrich the knowledge among the students about the municipal administration. It was useful to the students who got practical knowledge about the municipal administration.

The success of this project, to a large extent depends on the encouragement and guidelines provided by many others, in addition to my efforts. I take this opportunity to express my gratitude to the people who have instrumental in the successful completion of this project.

We would like to thank our *Principal Dr.* R. VENUGOPAL, M.Sc., Ph.D. who had been a source of inspiration and for his timely guidance in the conduct of my project work.

We thanks to Smt.A.DEVAKI., M.Com., SLET., Head of the Department of Commerce for his valuable suggestion and through out the course.

We express sincere thanks to my faculty guide Dr.G THIRUMALAIAH, M..COM, Ph.D. Associate Professor who guided me constantly and shared infinite time and interest and helped me at all times to enable me carry out project with confidence.

Finally and most importantly, I would like to express my heartfelt thanks to my beloved parents for their blessings, my family and friends for their help and wishes for the successful completion of this project. Above all I am indebted to Almighty God for his divine guidance and providence.

The success of this project, to a large extent depends on the encouragement and guidelines provided by many others, in addition to my efforts. I take this opportunity to express my gratitude to the people who have instrumental in the successful completion of this project.

We would like to thank our *Principal Dr.* R. VENUGOPAL, M.Sc., Ph.D. who had been a source of inspiration and for his timely guidance in the conduct of my project work.

We thanks to Smt.A.DEVAKL, M.Com., SLET., Head of the Department of Commerce for his valuable suggestion and through out the course.

We express sincere thanks to my faculty guide Dr.G THIRUMALAIAH, M..COM, Ph.D. Associate Professor who guided me constantly and shared infinite time and interest and helped me at all times to enable me carry out project with confidence.

Finally and most importantly, I would like to express my heartfelt thanks to my beloved parents for their blessings, my family and friends for their help and wishes for the successful completion of this project. Above all I am indebted to Almighty God for his divine guidance and providence.

A part from the effort of me the success of the project depends largely on the encouragement and guidelines of many others. I take opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project.

I would also like to thanks our **Principal Dr. R.VENUGOPAL,MSC, P.h.D.**, who had been a source of inspiration and for his timely guidance in the conduct of my project work.

I would also like to show my greatest appreciation to **Sri A.DEVAKI**, **M.Com**, **P.h.D.** Head of Department of Commerce. I can't say thanks enough for this tremendous support and help. I feel motivated and encouraged every time I attend his meeting. With out his encouragement and guidance this project would not have materialized.

I wish to express my deep sense of gratitude to my internal guide Sri. E. MURALI MOHAN REDDY, M.C.A Asst.Professor, for his able guidance and useful suggestion, which helped me in completing the seminar report, in time.

Finally, yet importantly, I would to express my heartfelt thanks to my beloved parents for their blessings, my friends/classmates for their help and wishes for the successful completion of this project

I would also like to thanks our **Principal Dr. R Venu Gopal M.Com,Ph.D.**, who had been a source of inspiration and for his timely guidance in the conduct of my project work.

I would also like to show my greatest appreciation to Smt A.DEVAKI M.C.om,SLET,Ph.D.,. Head of Department of Commerce. I can't say thanks enough for this tremendous support and help. I feel motivated and encouraged every time I attend his meeting. With out his encouragement and guidance this project would not have materialized.

I wish to express my deep sense of gratitude to my internal guide Sri. Mr.K.G PONNAMBALAM, M.C.A., Lecturer in Computer, for his able guidance and useful suggestion, which helped me in completing the seminar report, in time.

Finally, yet importantly, I would to express my heartfelt thanks to my beloved parents for their blessings, my friends/classmates for their help and wishes for the successful completion of this project
