Biodiversity:-

\* The term Brodiversity was first coined by The entomologist E. O. Wilson in 1986. \* Brodiversity is the heritage of million of years of evolution. \* Diversity is a basic property of life. \* The stalking feature of Earth is the existence of Life and the stariking feature of Life is its Diversity.

### Definition:-

\* Blodiversity Chilogical diversity) is The Total sum of all the Living organisms That exist on our earth. \* This Living wealth is The product of hundreds of willions of years of evolutionary history. \* The variability among Living organisms from all sources including terrestrial, movine and other avuatic ecosystems and the ecological complexes of which They are a part; This includes diversity within species between species and of ecosystems International convention on Blological diversity.

Impostance of Biodiversity:-\* Blodiversity is a broad Lerm For biological variety and It can be measured at a number of osganizational Levels. \* However, blologists are using measures of bio--diversity at several Levels of biological organi--zation (Including genes, populations, and ecosystems) to hop focus efforts to preserve The biologically and Lechno logically important elements of biddeversity \* Economic - bidliversity provides humans with new materials for consumption and production. \* Many Livelehoods, such as Those of farmers, Fishers and Timber workers, are dependent on blodeversity. \* Fological life support - Hodeversity provides Functioning ecosystems That supply oxygen, clean aw and water, pollhatton of plants, pest control, waste water treatment and many ecosystem services. \* systematic ecological data That help us to understand The natural world and it's origins. \* our tourism industry also depends on brodiversity.

Biodivensity Definition

"Biodiversity is the variation among living organism. from different sources including torsestaial, maxime and desert ecosystems, and the ecological complexes of which they are a part". What is Biodiversity:-Biadiversity describes the aichness and variety of Biadiversity describes the most complex and important life on earth. It is the most complex and important feature. Of our planet. Without biodiversity, life would not Rustain. The team biodiversity was coined in 1985. It is impostant in natural as well as astificial ecosystem It deals with nature's variety, the biosphese It refers to vagiabilities among plants, animals and milaologanizme species. Biodiversity includes the neember of different organism and their solution facquencies in an ecosystem. It also sofficte -16 Osganization of Osganisme at different levels.

\* Biodiversity holds ecological and economic significance. \* It paovide us with nowaishment, howing.fuel, 'Clothing and several other seconence. \* It also extracts monitary benefits through townism. \* Therefore, It is very important to have a good knowledge of biodiversity for a sustainable livelihood.

Flagship species:tagship species is a species that is used as a ambassadoa, symbol oa icon toa a defined abitat, environmental Cause Oa Compaign.

## ACKNOWLEDGEMENT

I would like to express my special thanks of gratitude to my lecturer Mrs. S. padmavathi <u>madam</u> who gave me the golden oppurtunity to do this wonderful project of the Land scaping

my project. I came to know about So many new things. I am really thankful to them.

Secondly i would also like to thank my parents and friends who helped me a lot in finalising this project within the limited time frame & with safe in this pandemic (covid) situation

> Your faithfully Kaveri. Lokesh TII'd B.SC (BZC) E/M Reg.NO-0319009016 GIDC, Nagari

Signature of the Head of Deportment S. PADMAVATHI LECTURER IN BOTANY GOVT. DEGREE COLLEGE NAGARI, CHITTOOR DL., A.P. Introduction Land scaping is the process of making of garden or land more attractive by desiging adding ornamental features and planting trees and shurbs.

TOPIC - Land Scaping

The planning of garden is an art. Agarden architect should learn enough of geobgy 'geography all should have profound knowledge about plants. Land scaping has huge impact on the Overall look and feel of home or place and it can improve resale value too. The land scaping style we choose should allow your yard to be a place where you can go to relax and decompress from the rest of the world.

when choosing a type of land scaping design, keep in mind your ultimate goals such as designing your yard for children, sustainability entertaining or relaxation. Basic principles of Landscape design:-There are 8 basic princles in Landscape design 1) unity:-

Unity in landscaping is the repetition and Consistency of a design. Repetition is used to bring about Unity in your design by repeating like plants and decor in the land scape. Consistency is used to Create Unity by fitting different elements 2) Balance:-

Balance is simple a sense of equality there are two types of balance in design: symmetrical and asymmetrical balance. In symmetrical two sides of landscape are identical while Asymme -trical, the land scape composition is balanced by using different elements and objects. 3) Contrast and harmony:-

contrast helps highlight certain elements in your design while harmony helps elements in a land scape compisition look unified. 4) Colour:-

Colour gives your land scape design the dimension of real life. warm colours seem to advance towards you, making an object seem closer while cool colours like blue and greens seem to move away from yoy.

# Introduction landscaping

\* A landscape is the visible features of an area of land, its landforms, and how they integrate with natural or man - made

Features, \* A landscape includus the physical elements of geography physically defind land forms such as mountain, hill, water bodies such as ruivers, laters, ponds and the sea, living elements of land cover including indigenous vegetation, human elements including different forms of land use, buildings and Bhructures, and transitory elements such as lightings and weathers conditions.

\* landscape can be as varied, Farmland, a landscape park and wilderness.

\* The earth as The vast range of landscape, including The icy landscape of polar regions, mountain landscape, forested, wooded landscapes, clucking past borcal forests, and tropical rainforests and acricultural landscape of temperature and tropical regions.

\* The activity of modifying the visible features of area of land is referred to as landscaping.

cultural landscaping

Definitions: -

\* As defined by the national park service, a cultural landscape is a geographic area, including both cultural and natural resources and the willdlife or domestic animals therein, associated with a historic event, activity, or person or exhibiting other cultural or asthetic values.

\* There are four general types of cultural landscopes, not maturally.

Enample of cultural landscapping:-

\* Include designed landscoping (Formal gardens and parks) \* ruteal or vernacular landscaping (sheep ranches). cultural landscaping (charecteristics):-

\* This paper starts from the natural and human elements composing of rural culture landscape, discusses the type both in material and non-material landscripe of neural culture landscape, and summerizes six basic characteristic of traditional neural culture landscape in china: - universality and Complexity.

Importance of cultural landscaping:-

\* Through their Form, features, and the ways they are used, cultural landscapes. reveal much about our evoling relationships with the natural world.

\* They provide, scenic, economic, ecological, social recreational and educational opportunities, which help includes, communities and nations understand themselves.

natural and cultural landscope:-

\* The cultural landscape is fashioned from a

ratural landscape by a cultural group.

\* Culture landscape is the result (Sour 1925) This implies that culture and nature are not multially exclusive, and that cultural landscape do not have to be entirely human and that cultural landscape do not have to be entirely human

#### landscape affects culture: -

\* Landforms might include physical features like mountains or oceans.

\* IF you live in the mountains, your likely to dwelcp a particular culture that adapts to life at a high altitude.

\* For example, you night wear heavier clothing and tend to be physically stronger as a result of climbing often. Roads cultural landscapes:-

\* Different caligones of these ways can be distinguished read landscoping can be recognized as cultural heritate, cultural huritage objects Functionally related or unrelated to the road can exits in its surnouncling environment, and roads can also be treated as cultural heritage objects in landscope.

LECTURE IN CHEMISTRY GOVT DEGREE COLLEGE, NAGARI 1. SUMMARY OF TEST PRINCIPLES AND CLINICAL RELEVACE. A. Total cholesterol:-

Choksterool is measured enzymetically in secure or plasma in a series of coupled reactions that hydrolyzed cholesterool esters and oxidize the 3-off group of cholesterool. One of the reaction byproducts. the 2 is measured quantitatively in a peroxidese catalyzed reaction that produces a color. Absorbance is measured at soo nom. The colors intensity is proportional to cholesterool concentration. The reaction Sequence is as follows.

Cholesterryl ester hydrolase. cholesterryl ester + tt\_0 -----> Cholesterrol + fatty acid. cholesterrol 0xidase. cholesterrol + 02 -----> cholest - 4-en - 3-one + H202

B. Trighycerides:-

Trigly cerides are reasoned enzymotically in series or plasma Using a series of coupled reactions in which trigly cerides are hydroplyzed to produce glycerol. Glycerol is then oridized Using glycerol oxidase, and H202, one of the reaction products. is measured as described above for cholesterol Absorbance is measured at soo orm. The reaction sequence is as follows. Trigly cerides + 340 -----> glycerol + fatty acids glycerookinase. Glycerool + ATP -----> glycerool - 3- phosphate + ADP

C. High density lipoportein (HDL) Cholesterol.

Low servin concentrations of HDL - cholosterol are associ ated with increased risk for CHD cornorary risk increases more keelly as the HDL concentration decreases from 40-to 30 mg/dL. A low HDL - cholesterol concentration is considered to be a value. below \$35 mg/dL. and high HDL 260 mg/dL. HDL - cholesterol values are also Used in the calculation of LDL - cholesterol.

HDL-Cholesterry / esters PEG-cho-est. > HDL - Unesterrified cholesterrol + fatty acid.

D. LDL - Cholesterol.

Most of the circulating cholestool is found in three majors lipoprotein fractions, very low density. Lipoproteins, LoL and HoL.

LDL-cholesterol is calculated from measured values of total cholestool, trigly cerides and HDL- cholesterol according to the relationship.

where (TG)/s is an estimate of VIDL - cholesterol and all values are expressed in mg/dL.

# CASEIN AND CHOLESTEROL VARIANT IN COW'S MILK

### Introduction :

Cow milk Constitutes a major part of the dief of developed nations and it Contains an average 32 g of protein per- litre [] mostly Casein 82% and whey 18%. The Caseins have been divided into four Sub classes del, 282 B and K [2,3], whose major function is to transport Calcium phosphate (4). B-case in is the Second most abundant Case in behind XSI (1) and is essential for curd formation and important in dertermining the Surface properties of micelles (2). To date logenetic Variants of B- Casein have been characterised with regard to sequence [5,6], and of these only. A', A?, A3 and B are found in nearly all Bos taurus populations [1,8]. The allelic distribution of Variants is Such that the majority of cows in western nations produce milk rich in the genetic Variant B- Casein Al. For example, Holstein and Ayrshire breeds of Cow produce 63 and 67% A', respectively, and 35 and 33% AR OI. In Contrast the Guernsey breed produces 11. A' and 98.1. AR. Alignment of B- case in A' and B- Case in A? protein

that in the absence of dietary. Cholesterol there was a slight, but not significant increase in neointimal thickening in Genoup & rabbits (104. B- Case in A) Compared with Group 3 (104. B Case in A2) and Group 1. Likewise the genoups fed 5, 10 and 204. B-Case in A' plus 0.54. Cholesterol had thicker heointimas than Genoup 1. Groups fed 5, 10 and dor. B- Case in A? plus 0.54. Cholesterol had thinner neointimas than their B- Case in A' Counterparts.

There was no neointimal thickening observed In any of the Contralateral uningured Carotid enteries.

percent luminal Surface area of anota Coverd by lipid - filled lesions. Note that in Group I there were no areas of lipophilic staining

#### **1.1 INTRODUCTION TO PROJECT**

The objective behind developing Traffic offence through online Challana is to save the customers time and money in the process of challana payments Compared to those incurred from attending as manual.

In this system Employees can add the fines to the customer based on the offence. Customer can check his challana status by entering vehicle No and he can pay the fine amount through credit card.

#### Features include

- Provide rich user interface and secure registration.
- The Employees information files can be stored in centralized database which can be maintained by the system.
- Data Reports.
- Maintenance of profile details of the employees, and retrievals as and when required.
- Customer Challana Details.
- Customer Challana Payment Details.
- Vehicle Registration Details.
- Authentication is provided for this application. Only registered users can access

#### **Organization Profile**

Software Solutions is an IT solution provider for a dynamic environment where business and technology strategies converge.

Their approach focuses on new ways of business combining IT innovation and adoption while also leveraging an organization's current IT assets. Their work with large global corporations and new products or services and to implement prudent business and technology strategies in today's environment.

#### VS Infolink's Range Of Expertise Includes:

- Software Development Services
- Engineering Services
- Systems Integration
- Customer Relationship Management
- Product Development
- Electronic Commerce
- Consulting
- IT Outsourcing

We apply technology with innovation and responsibility to achieve two broad objectives:

- Effectively address the business issues our customers face today.
- Generate new opportunities that will help them stay ahead in the future.

#### This approach rests on:

- A strategy where we architect, integrate and manage technology services and solutions we call it AIM for success.
- A robust offshore development methodology and reduced demand on customer resources.
- A focus on the use of reusable frameworks to provide cost and times benefits.

They combine the best people, processes and technology to achieve excellent results - consistency. We offer customers the advantages of:

#### Speed:

They understand the importance of timing, of getting there before the competition. A rich portfolio of reusable, modular frameworks helps jump-start projects. Tried and tested methodology ensures that we follow a predictable, low - risk path to achieve results. Our track record is testimony to complex projects delivered within and evens before schedule.

- 1. User Friendliness is provided in the application with various controls provided by system Rich User Interface.
- 2. Provides secure registration and profile management of all users.
- 3. It provides online challana payments through credit card.
- It can be accessed over the Intranet.
- 5. Customer can check his challana status.
- 6. The Employees information files can be stored in centralized database which can be maintained by the system.
- Authentication is provided for this application. Only registered users can access.
- Report generation feature is provided to generate different kinds of data reports.
- 9. This system is developed by using web services.
- 10. In this system communication provided between users through email.

#### **GRAMPANCHAYAT SYSTEM**

### ABSTRACT

Generally with the advance of the technology the burden on the user is reduced. By this a lot of time is saved for the people. Generally people have to go to the panchayat office in the villages for notifying their problems. This normally consumes lot of time and burden on the person. In this paper we are going to eradicate the drawback which is occurred in the existing system by simply notifying the problems in online and they can know the status easily via online.

#### EXISTING SYSTEM

Generally in villages the people have to visit panchayat system for sharing their rural problems to the president. There is no guarantee that the president can take their problems. The villagers don't know the president is present or not at the time they go to the panchayat office. This generally increase burden on the user. If they have an important work they have to postpone their work thus causes time wastage.

#### Disadvantages

- A lot of time is wasted.
- Burden on the user is increased.

#### **PROPOSED SYSTEM**

. In this paper we are going to eradicate the drawback which is occurred in the existing system by simply notifying the problems in online and they can know the status easily via online. By this they can complaint their problems to the

president at any time. They can view the status of the complaint. They may or may not give suggestions to the president for the work which is going on the village. All these actions are view by the admin.

### Advantages

- A lot of time is saved.
- This generally reduces burden on the user.

#### ABSTRACT

A city is a large settlement. Cities generally have extensive systems for housing, transportation, sanitation, utilities, land use, and communication. Their density facilitates interaction between people, government organizations and businesses, sometimes benefiting different parties in the process. In existing system people face so many problems about job search and travelling information. At that they don't know which company has vacancies and which conduct interviews. The people who want to know about these details they went each and every company and talk with someone on that company finally get all those details its take lot of time. If the people want to go from one location to another location this situation also face so many problems. If the people who are new that city they don't know about bus number and which bus going to from where to where to overcome all these problems we go for proposed model. The main aim of the application is to build a website. In this web application we are providing job search and travel services of a particular city.

 P. VINOD III BSc MPCs (E.M)

Guided by M. RAJASEKHAR Department of Physics

2020-21

# DISPERSIVE POWER OF THE METERIAL OF PRISM

me and the of the Prite Aim :- To determine the dispersive power of the meterial of the different prismy using spectrometer.

Apparatus:- alass prism, spectrometer, mercury vapour lamp, spirit level, readinglens with torch light.

formula: The dispersive power of the meterial of a prism is,  $W = \frac{MB - MR}{M - 1}$ 

where,  $M_B = Refractive index of blue spectral line$ MR = Refractive index of red spectral line

$$\mathcal{M} = \frac{\mathcal{M}_{B} + \mathcal{M}_{R}}{2}$$
  
The refractive index for a specific colour is,  
$$\mathcal{M} = \operatorname{Sin}\left(\frac{A + D_{M}}{2}\right)$$

$$sin(A_2)$$

A = Angle of the prism where, Dr = Angle in minimum deviation in the prism Gor specific colour

Procedure: The primary adjustments of the spectrometer are made. The experiment is performed in two parts.

(i) Determination of angle of the prism :-In order to determine angle (A) of the prism, the prism is placed on the prism table with the vertex Man A towards the callimator of the spectrometer as shown in

figure (i).

the prism. The light gets retracted at AB and emerges out through Ac in a direction bending towards the base BC. NOW, the telescope is adjusted so as to view the spectrum in its field of view. Observing the blue line of the spectrum through the telescope is rotated slowly until the Vertical cross wire coincides with the blue line of the spectrum. The reading on the circular scale is noted. The readings should be fater on the two verniers Vi and Vi. The experiment is repeated with different colours of the spectrum and im each case the reading on the circular scale are noted. The prism is fater out and the belescope

"is brought in line with the callimator. The telescope is adjusted, antil the vertical cross wire is coincides with the direct images of the slit and the readings on both Verniers VI and V2 are noted. The angle of each colour are noted. Enowing the values of refractive indexes for red and blue colours the dispersive power of the material of the prism can be calculated.

## Precautions : -

50

(1) These should be no parallax between the vertical cross wire and the image of the slit.

A = 60°00'

Inference

We have conducted the experiments with different pousing which is made up of different meterials such as crownglass, Flint-glass, The most denseglass.

The dispersive power of Crownglass is = 0.0150 The dispersive power of Flint-glass is = 0.0298 Flint The dispersive power of deuscrylass = 0.0399

the most dispersive power of the most dens flent glass = 0.0399 So we concluded that the most dense Flintglass has the more dispersive power,

# 2020-21

#### A Project work on

#### "FINDING BEST DETERGENT USING SURFACE TENSION TECHNIQUE"

#### Abstract

When a detergent added to water, it reduces surface tension of water. Water can then easily enter into the pores of a cloth and can remove the dirt from inside the cloth. Then its cleaning effect will be better. The more is the lowering of surface tension of water by a detergent then better is its cleaning effect.

A liquid with less surface tension will raise a lesser height in a capillary tube of a given bore. Different solutions of same concentration are taken and the rise in same capillary tube is measured in each case. One which raises the least has the lowest surface tension. The detergent forming that solution has the best cleaning effect. A study is undertaken to find the best detergent among the available samples. Four detergent solutions of same concentration are selected and their surface tensions are determined.

#### INTRODUCTION:

Surface tension is the property of the liquid which makes the surface area of the liquid minimum. A free liquid surface acts as a stretched elastic membrane. Due to this a liquid having high surface tension, liquids can rise or lower in a capillary tube. Capillary tube is a glass tube having a uniform bore of radius about 1mm, the liquid with less surface tension will rise a lesser height in a capillary tube. This principle is used in our present project.

The surface tension of a liquid can be determined using the given formula (for the narrow tubes)

$$T = \frac{rdgh}{2}$$
  
Where r = radius of capillary tube  
h = capillary rise  
d = density of the water= 1.0 g/cc

g = acceleration due to gravity=980  $\text{ cm/s}^2$ 

#### MATERIALS REQUIRED:

Capillary tube fitted with a twice a bent pin, retort stand, traveling microscope, clean water in a beaker, four available different detergents, four beakers, physical balance and weights.

#### **METHOD** (CAPILLARY RISE METHOD)

Clean water is taken in a beaker and capillary tube is dipped in the water such that, the tip of the pin just touches the water surface. With the help of traveling microscope, the capillary rise in the tube 'h' is determined.

Equal masses of different detergents are taken in different beakers. These detergents are dissolved in equal volumes of distilled water in different beakers. With the help of traveling microscope, the capillary rise of different liquids in the capillary tube is determined separately. The readings are tabulated in tabular-1.

The capillary tube is taken out from the beaker and is arranged horizontally to the retort stand. With the help of traveling microscope, the internal radius of the capillary tube is determined. The readings are tabulated in table-2. The surface tension of different detergents can be calculated using the formula given below

$$rhdg$$
  
 $r = ------2$ 

# **RESULTS AND DISCUSSIONS:**

-	Traveling m	icroscope reading	Internal	Internal radius	
S.No	Top end of inner circle of capillary tube R <sub>1</sub> (cm)	Bottom end of inner circle of capillary tube R <sub>2</sub> (cm)	diameter D= $R_1 \sim R_2$ (cm)	r = D/2 (cm)

5	Rin	100	5	3.392	2.570	0.822	24.36

# Determination of surface tension

Table 2 shows the surface tension values of different detergent liquids.

#### **CONCLUSION:**

From the values obtained in the table2, it is clear the capillary rise and the corresponding **surface tension calculated is less for the detergent "Surf excel"** when compared to the other detergents under consideration. Hence "Surf excel" is the better detergent among the detergents under consideration.

#### 2020-21

#### **Brief Report on Field Trip**

On behalf of Dept.of political Science, the staff and the students of BA course visited the municipal office, Nagari on 17-08-2021 as part of "Field Trip" program. We reached the municipal office 11 am of the same day.

We were met the commissioner, municipality, Nagari in his chamber in the office. The commissioner received us with pleasure. The staff introduced the students to commissioner name by name. Then we interacted with the commissioner about the administration in the municipality and students were clarified some doubts regarding the powers ,functions and resources of municipality from the commissioner. He also disclosed about the 74<sup>th</sup> Amendment Act which was enacted for urban governments. We were very much interacted with the commissioner's interaction.

No doubt the field trip was to enrich the knowledge among the students about the municipal administration. It was useful to the students who got practical knowledge about the municipal administration.

2018-2021

The success of this project, to a large extent depends on the encouragement and guidelines provided by many others, in addition to my efforts. I take this opportunity to express my gratitude to the people who have instrumental in the successful completion of this project.

We would like to thank our *Principal Dr.* R. VENUGOPAL, M.Sc., Ph.D. who had been a source of inspiration and for his timely guidance in the conduct of my project work.

We thanks to Smt.A.DEVAKI., M.Com., SLET., Head of the Department of Commerce for his valuable suggestion and through out the course.

We express sincere thanks to my faculty guide **Dr.G THIRUMALAIAH**, M..COM, Ph.D. Associate Professor who guided me constantly and shared infinite time and interest and helped me at all times to enable me carry out project with confidence.

Finally and most importantly, I would like to express my heartfelt thanks to my beloved parents for their blessings, my family and friends for their help and wishes for the successful completion of this project. Above all I am indebted to Almighty God for his divine guidance and providence.

#### DECLARATION

We V M BHARATH (219009004), M R DAKSHINAMOORTHY (219009005), K V DINESH (219009006), R B GAJENDIRAN (219009007), M D GANESAN (219009008) to hereby declare that the project report entitled "CORPORATE PLACEMENTS " done under the esteemed guidance of Sri. Mr.K.G PONNAMBALAM, M.C.A., Lecturer in Computer, Department of Computer Applications, Govt Degree College-Nagari is submitted in partial fulfillment for the award of the degree of Bachelor of Commerce.

DATE : PLACE :

A part from the effort of me the success of the project depends largely on the encouragement and guidelines of many others. I take opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project.

I would also like to thanks our **Principal Dr. R Venu Gopal M.Com,Ph.D.,.,** who had been a source of inspiration and for his timely guidance in the conduct of my project work.

I would also like to show my greatest appreciation to Smt A.DEVAKI M.C.om,SLET,Ph.D., Head of Department of Commerce. I can't say thanks enough for this tremendous support and help. I feel motivated and encouraged every time I attend his meeting. With out his encouragement and guidance this project would not have materialized.

I wish to express my deep sense of gratitude to my internal guide Mr.K.G PONNAMBALAM, M.C.A., Lecturer in Computer, for his able guidance and useful suggestion, which helped me in completing the seminar report, in time.

Finally, yet importantly, I would to express my heartfelt thanks to my beloved parents for their blessings, my friends/classmates for their help and wishes for the successful completion of this project
